SAFETY SUITE®

End-to-End

Driver Performance Management

END-TO-END
Driver Performance Management

CONSOLIDATE DATA

Consolidate your existing driver data and systems for improved visibility

GAIN INSIGHTS

Gain valuable insights from proactive and predictive analytics

TAKE ACTION

Take action with targeted driver coaching & engagement

DRIVER MANAGEMENT
Challenges

01 DISPARATE DATA

makes it hard to understand driver performance

02 REACTIVE COACHING

and one-off training results in frustrated drivers and nuclear consequences

03 DRIVER TURNOVER

and poor engagement within the first 90 days

04 MISALIGNED DEPARTMENTS

keep Safety & Operations siloed

Coaching Drivers

TYPICAL CHALLENGES

Minimal visibility into training process

Reactive to past events, rather than **proactive**

Training records only include what has happened

WITH SAFETY SUITE

Full visibility into high-level & day-to-day training

Intervene with coaching & training **before** a crash

Full documentation of all training & engagement events

Identifying Risk

TYPICAL CHALLENGES

- Impersonal scorecarding fails to spot risk

- Data obscured across multiple systems

- Multiple driver risk scores across systems

WITH SAFETY SUITE

- Artificial Intelligence models spot risk, personalized to each driver

- Canned and custom reports on all your data

- One comprehensive **Driver Watch List Score**

Engaging with Drivers

TYPICAL CHALLENGES

Novice managers have to coach veteran drivers

No agenda or set talking points to guide the conversation

A fleet's safest drivers are rarely seen as needing attention

WITH SAFETY SUITE

Managers easily pull data to use for driver feedback & get driver buy-in

Templated / custom plans contain set agenda and talking points

Even your safest drivers are in regular contact with their manager

Retaining Drivers

TYPICAL CHALLENGES

- Accidents result in termination & involuntary turnover

- Safest drivers feel disconnected & have minimal communication with their managers

- Drivers leave for greener pastures & sign-on bonuses

WITH SAFETY SUITE

- At-risk drivers are spotted **before** a crash occurs

- Driver managers can track interactions with safe drivers to help them feel respected & a part of the culture

- Fleets build strong connects with their drivers and can offer a robust professional development program

Reporting on Driver Behavior

TYPICAL CHALLENGES

Disparate systems make it impossible to find relevant data

When data is found, relevant reporting takes hours

Double entries and mis-entries are common

WITH SAFETY SUITE

One reporting platform for all your driver data

Run canned or custom reports in minutes

One system eliminates double-entries and mis-entries

SAFETY SUITE
Solutions

01 ONE PLATFORM
for all your driver data

02 MACHINE LEARNING
to identify driver risk

03 HIGH-VISIBILITY
templated training plans

04 CLEAR ENGAGEMENT
& talking points for managers

05 ROBUST REPORTING
on fleet and driver performance

REAL NUMBERS
The Impact of Safety Suite

4,000 DRIVER FLEET

Cut Million Mile accidents by 43% using the Driver Watch List and proactive training

ACROSS ALL FLEETS

Over 60% of preventable crashes are drivers at the top of our Watch List

600 DRIVER FLEET

Reduced accidents per driver by 52% while growing from 600 to 900 drivers
