Series C - 2017, Series D - 2019

## Company Description

Contrast Security is the world's leading provider of security technology that enables software applications to protect themselves against cyberattacks, heralding a new era of self-protecting software.

A code security tool developer that embeds code analysis and attacks prevention directly into the software. This eliminates the need for disruptive scanning, expensive infrastructure workloads, and specialized security experts.

## Opportunities Identified

Access to corporates

Risk consulting

## Selected / Targeted customers

Large and mid-size enterprises

## Platform approach and favorable outcomes for application security improvements

## The Contrast Unified Platform Approach
