Company Description

D-ID is a Tel Aviv-based Creative Reality™ startup specializing in patented video reenactment technology using AI and deep learning.

D-ID's products range from animating still photos, to facilitating high-quality video productions, to developing high-quality digital avatars.

D-ID unveils new chat API to enable face-to-face conversations with an AI digital human (i.e. ChatGPT) that enables users to experience what it's like to chat with an AI-powered digital person in a more human and natural way.

Differentiation

- High-quality video production
- Self-service studio
- API offer

Opportunities Identified

- E-learning
- Corporate training
- Customer experience
- AI assistants and the Metaverse
- Sales Enablement

Platform Overview & Process
