Company Description

Idelic is a driver management platform designed to consolidate fleet data systems and automate compliance processes. The platform helps prevent crashes, reduce driver turnover, and lower insurance costs by unlocking the power of data organization, artificial intelligence, and smart driver management.

Differentiation

Platform that captures holistic view of driver risk via integration of numerous point solutions and disparate data

Target Customers

Mid-market and enterprise trucking fleets

Opportunities Identified

Insurance/ Reinsurance

Telematics

Distribution: Access to fleet management companies

Risk Management solution

360 Overview + Integration

Integrate All Your Third-Party Systems

Safety Suite is the only driver-management platform that seamlessly integrates ALL of your third-party systems.

By allowing you to push and pull driver data from all your systems on a single, easy-to-use platform, **we make the software you're already using more valuable.**
