Solution Overview

All you need to bring your hybrid workplace to the next level

Desk Booking

The first desk booking app that is maximally intuitive and employees will love – from day one.

Room Booking

Booking meeting rooms has never been easier. Our floor plan feature makes finding the room you need quick and easy.

Week Planning

Who is in the office? Who is working from home? Share your work location and get notified when colleagues plan to visit the office.

Admin

Manage every aspect of your hybrid workplace in our powerful admin center: office capacity, seating, zones, check-in, access, and more.

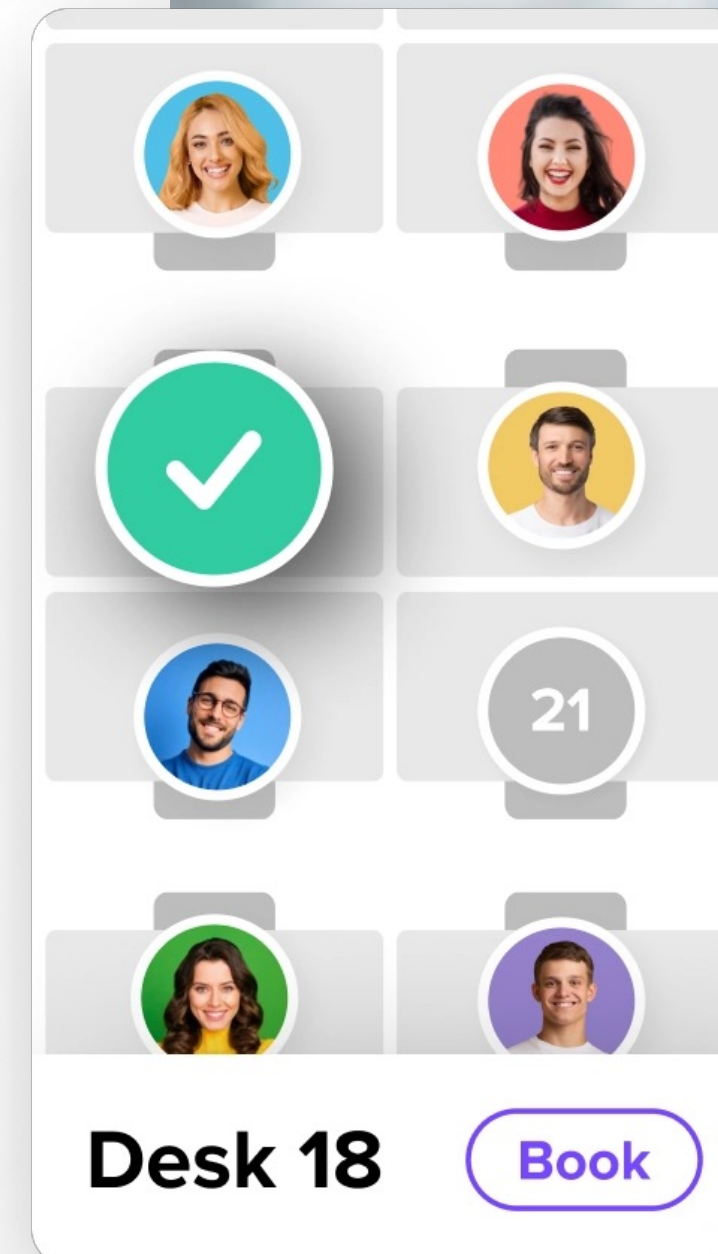

Analytics

Get detailed insights into office utilization and attendance to create the best workplace experience for your employees.

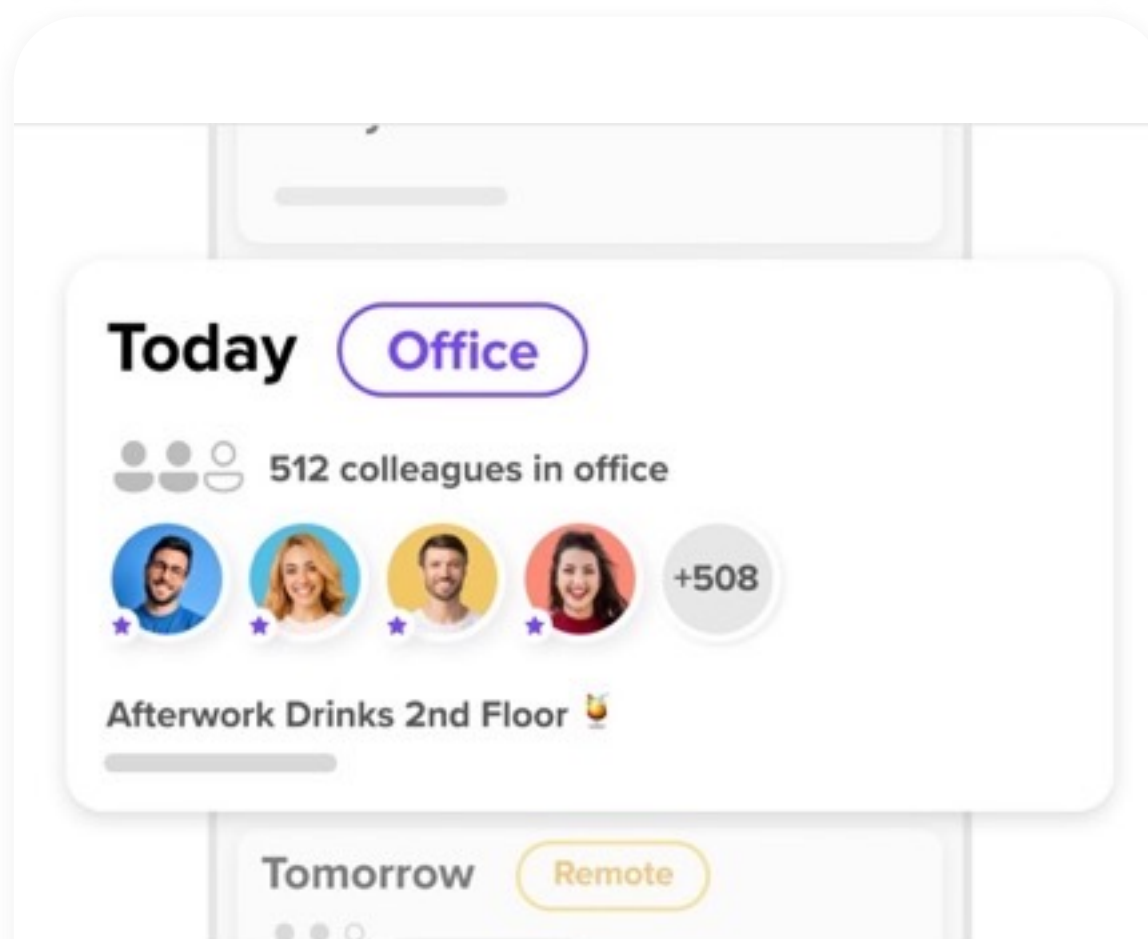

The power of simplicity

Finally, a maximum intuitive desk booking app that employees will love, from day one!

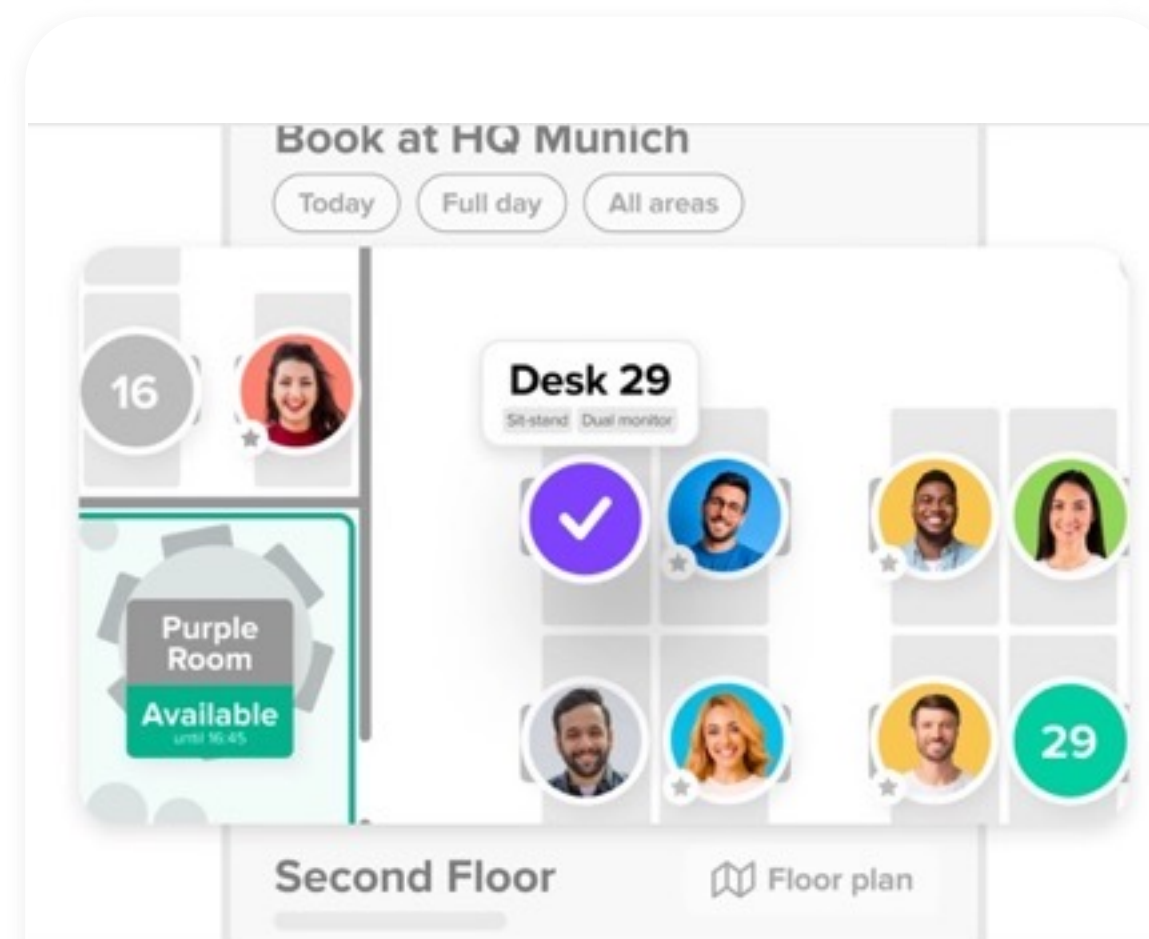

Desk booking key features

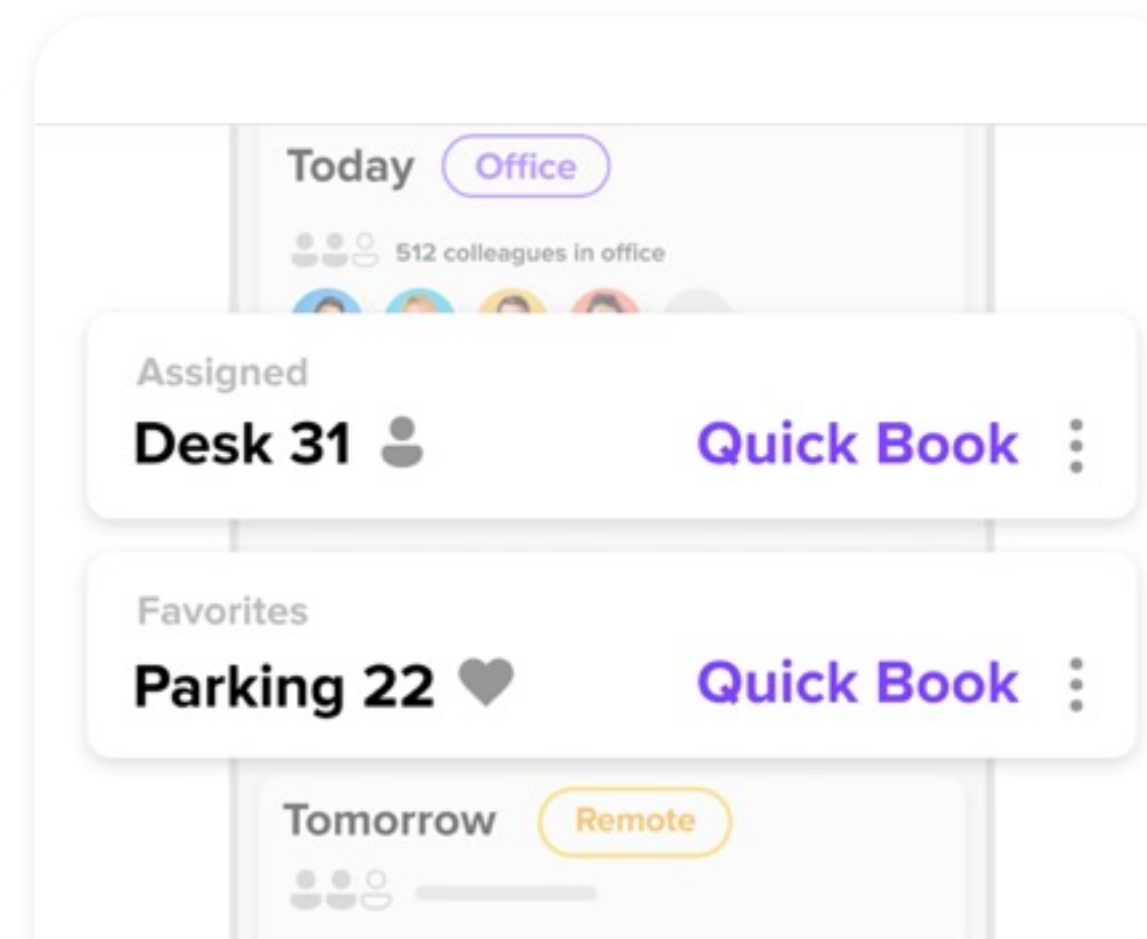

Social feed

Who's in today? Am I missing out at the office? Bring your people back to a vibrant workplace by giving them full transparency.

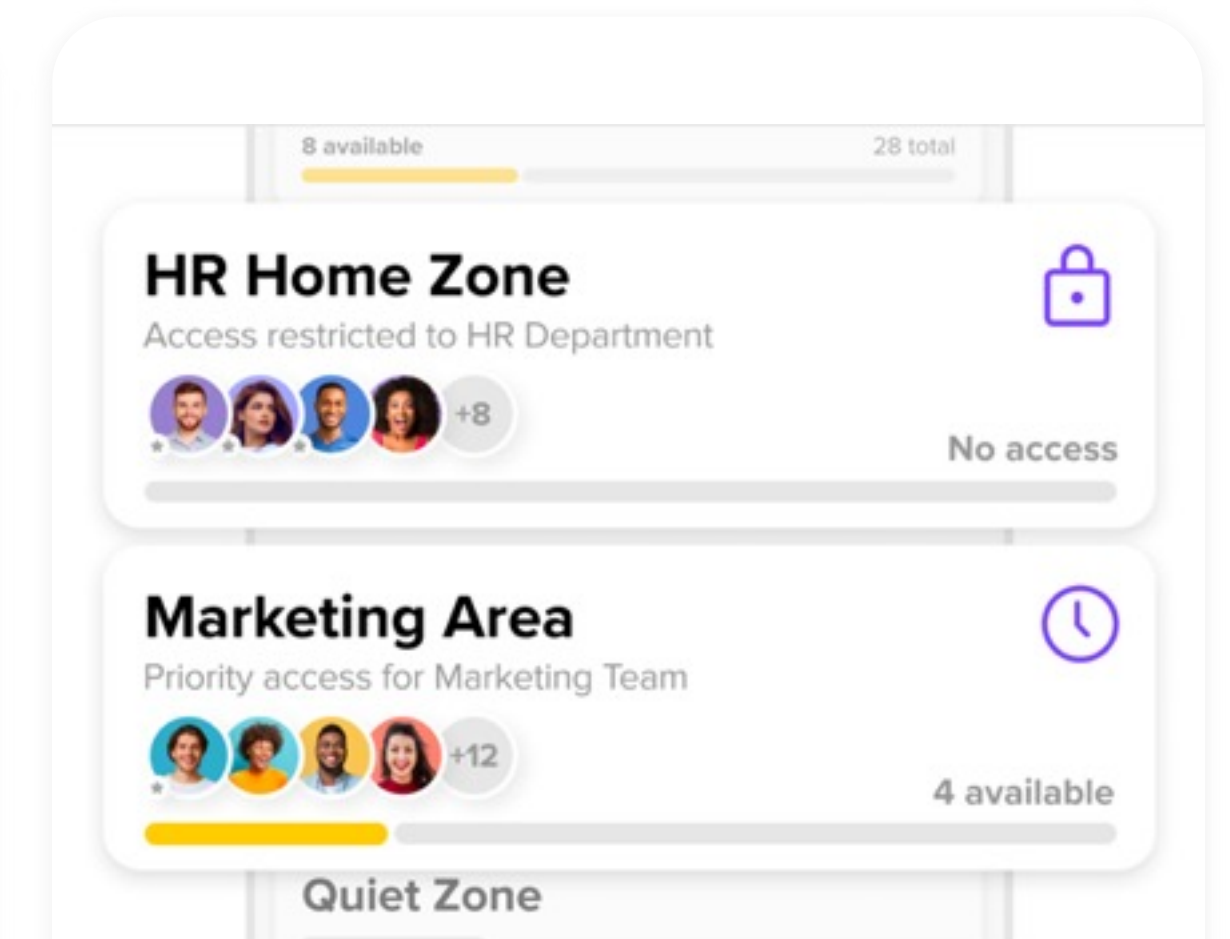

Interactive plans

Use the interactive floor plan to get a bird's-eye view of all the available seating options and who's sitting where.

1-click bookings

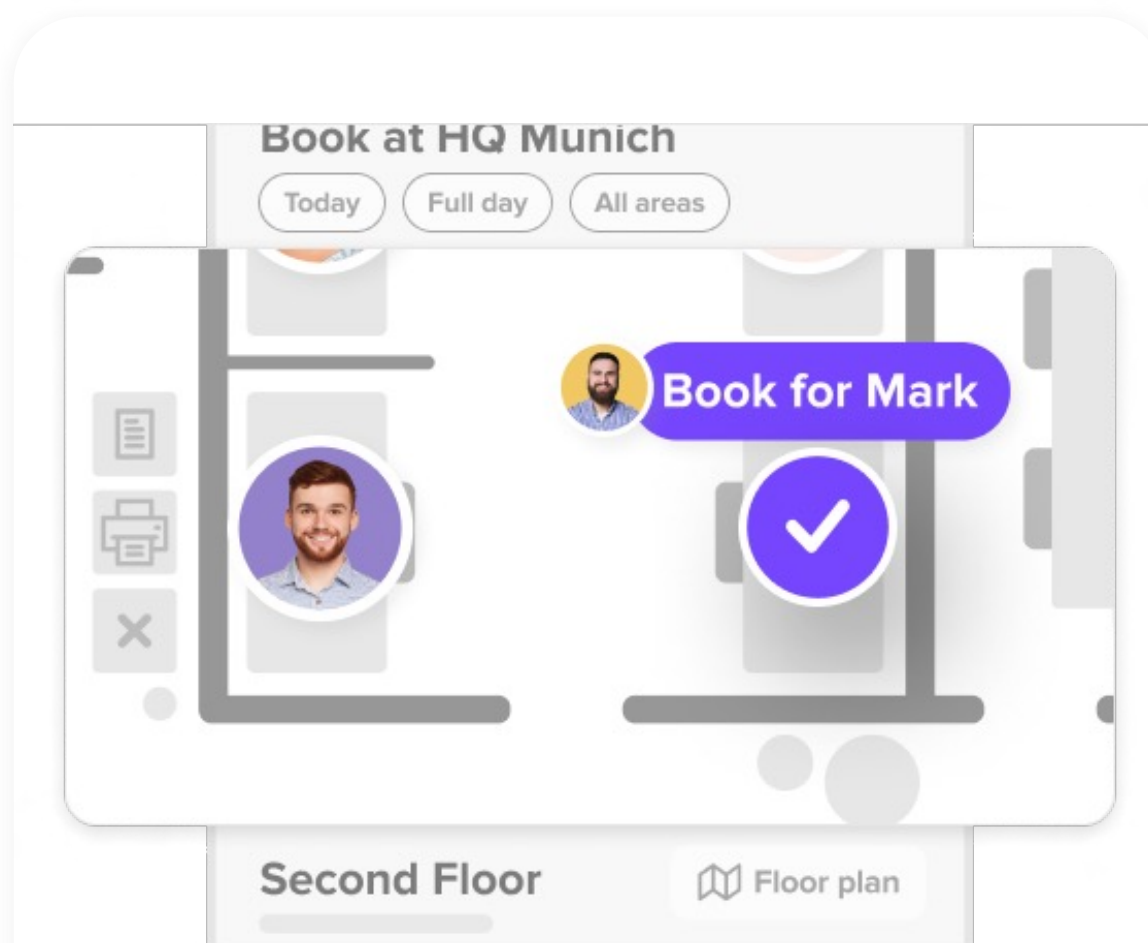

Make desk booking a one-click job by defining assigned desks and giving your employees the possibility to add favorite desks.

Area restrictions

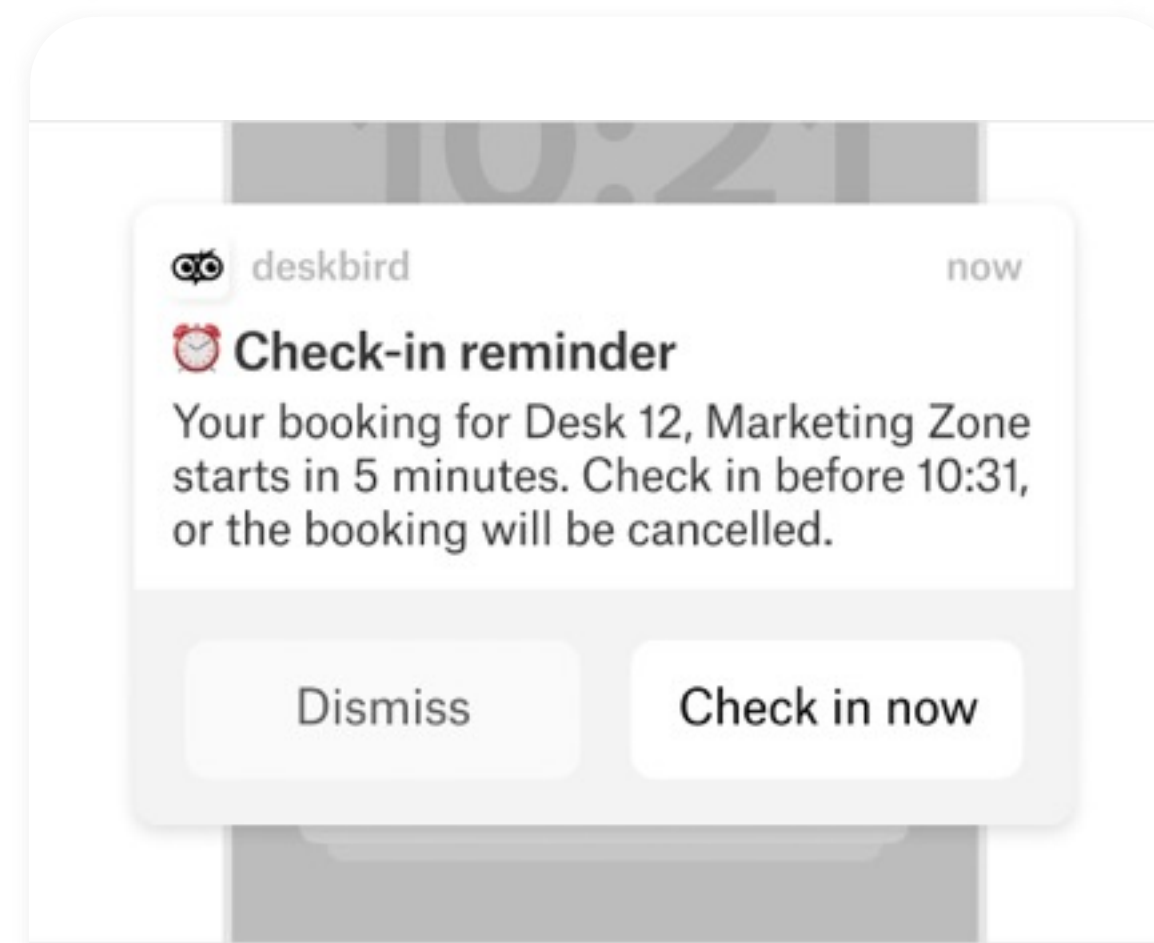

Easily restrict access to specific resources or enable priority access to ensure you satisfy everyone's workplace needs.

Desk booking key features

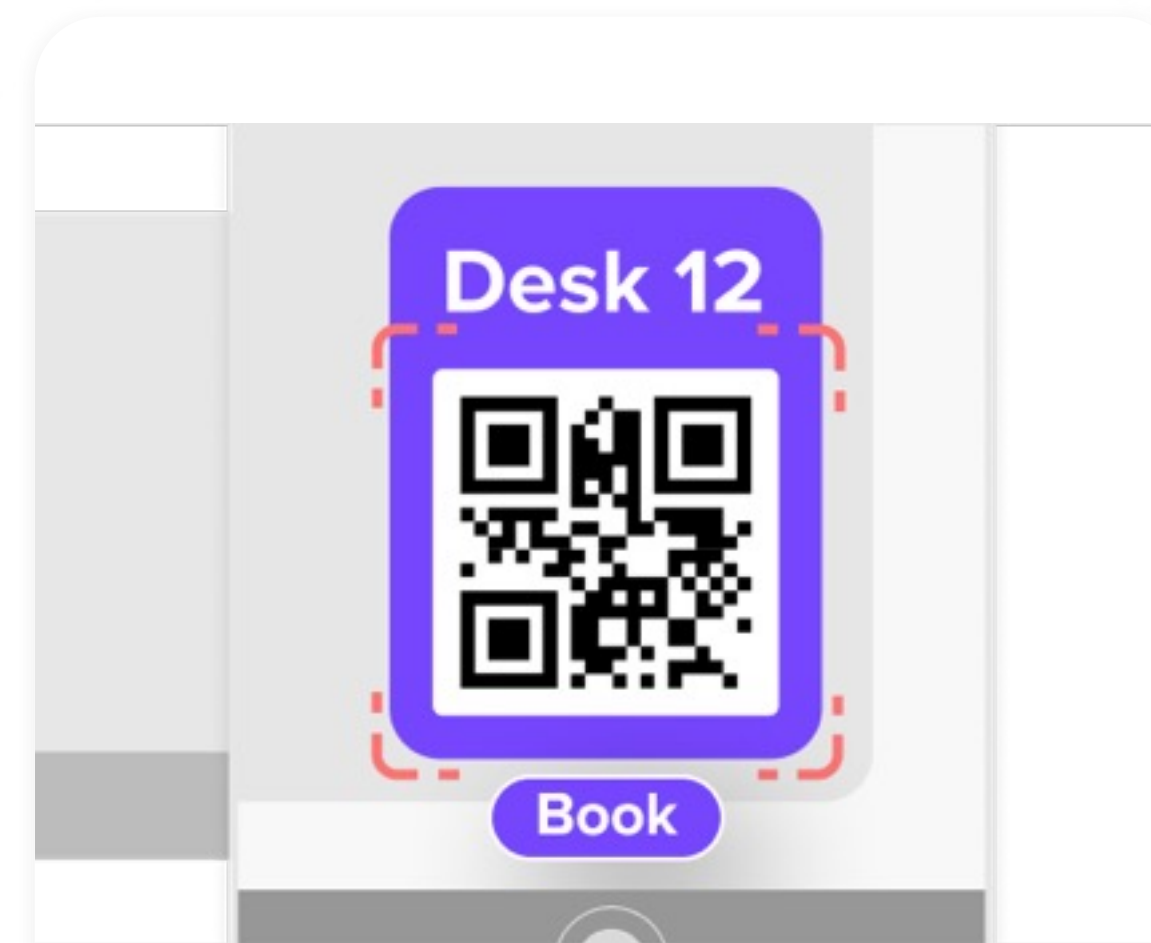

Team booking

Do you want to book a desk for your colleague? Or for your team? Easy! Add their names to the floor plan, and click book. Job done!

Check-ins

Make sure booked desks don't remain unused, with our check-in configuration options – either via a simple click or a QR code scan.

QR-Codes

Add QR codes to your desks and let your employees make bookings on the spot – for those people who did not book in advance.

Further desk booking features

Find colleagues

Use the search function to find colleagues and see where they are.

Desk types & filtering

Find the right desks by filtering by equipment.

Book multiple days

Book for several days in advance in one go.

Anonymous bookings

Choose to book without being visible to others.

More than desks

The perfect tool to book parking spots, charging stations and more.

Access restrictions

Limit the booking ability of an area only to specific users.

Native mobile apps

Available for Android and iOS.

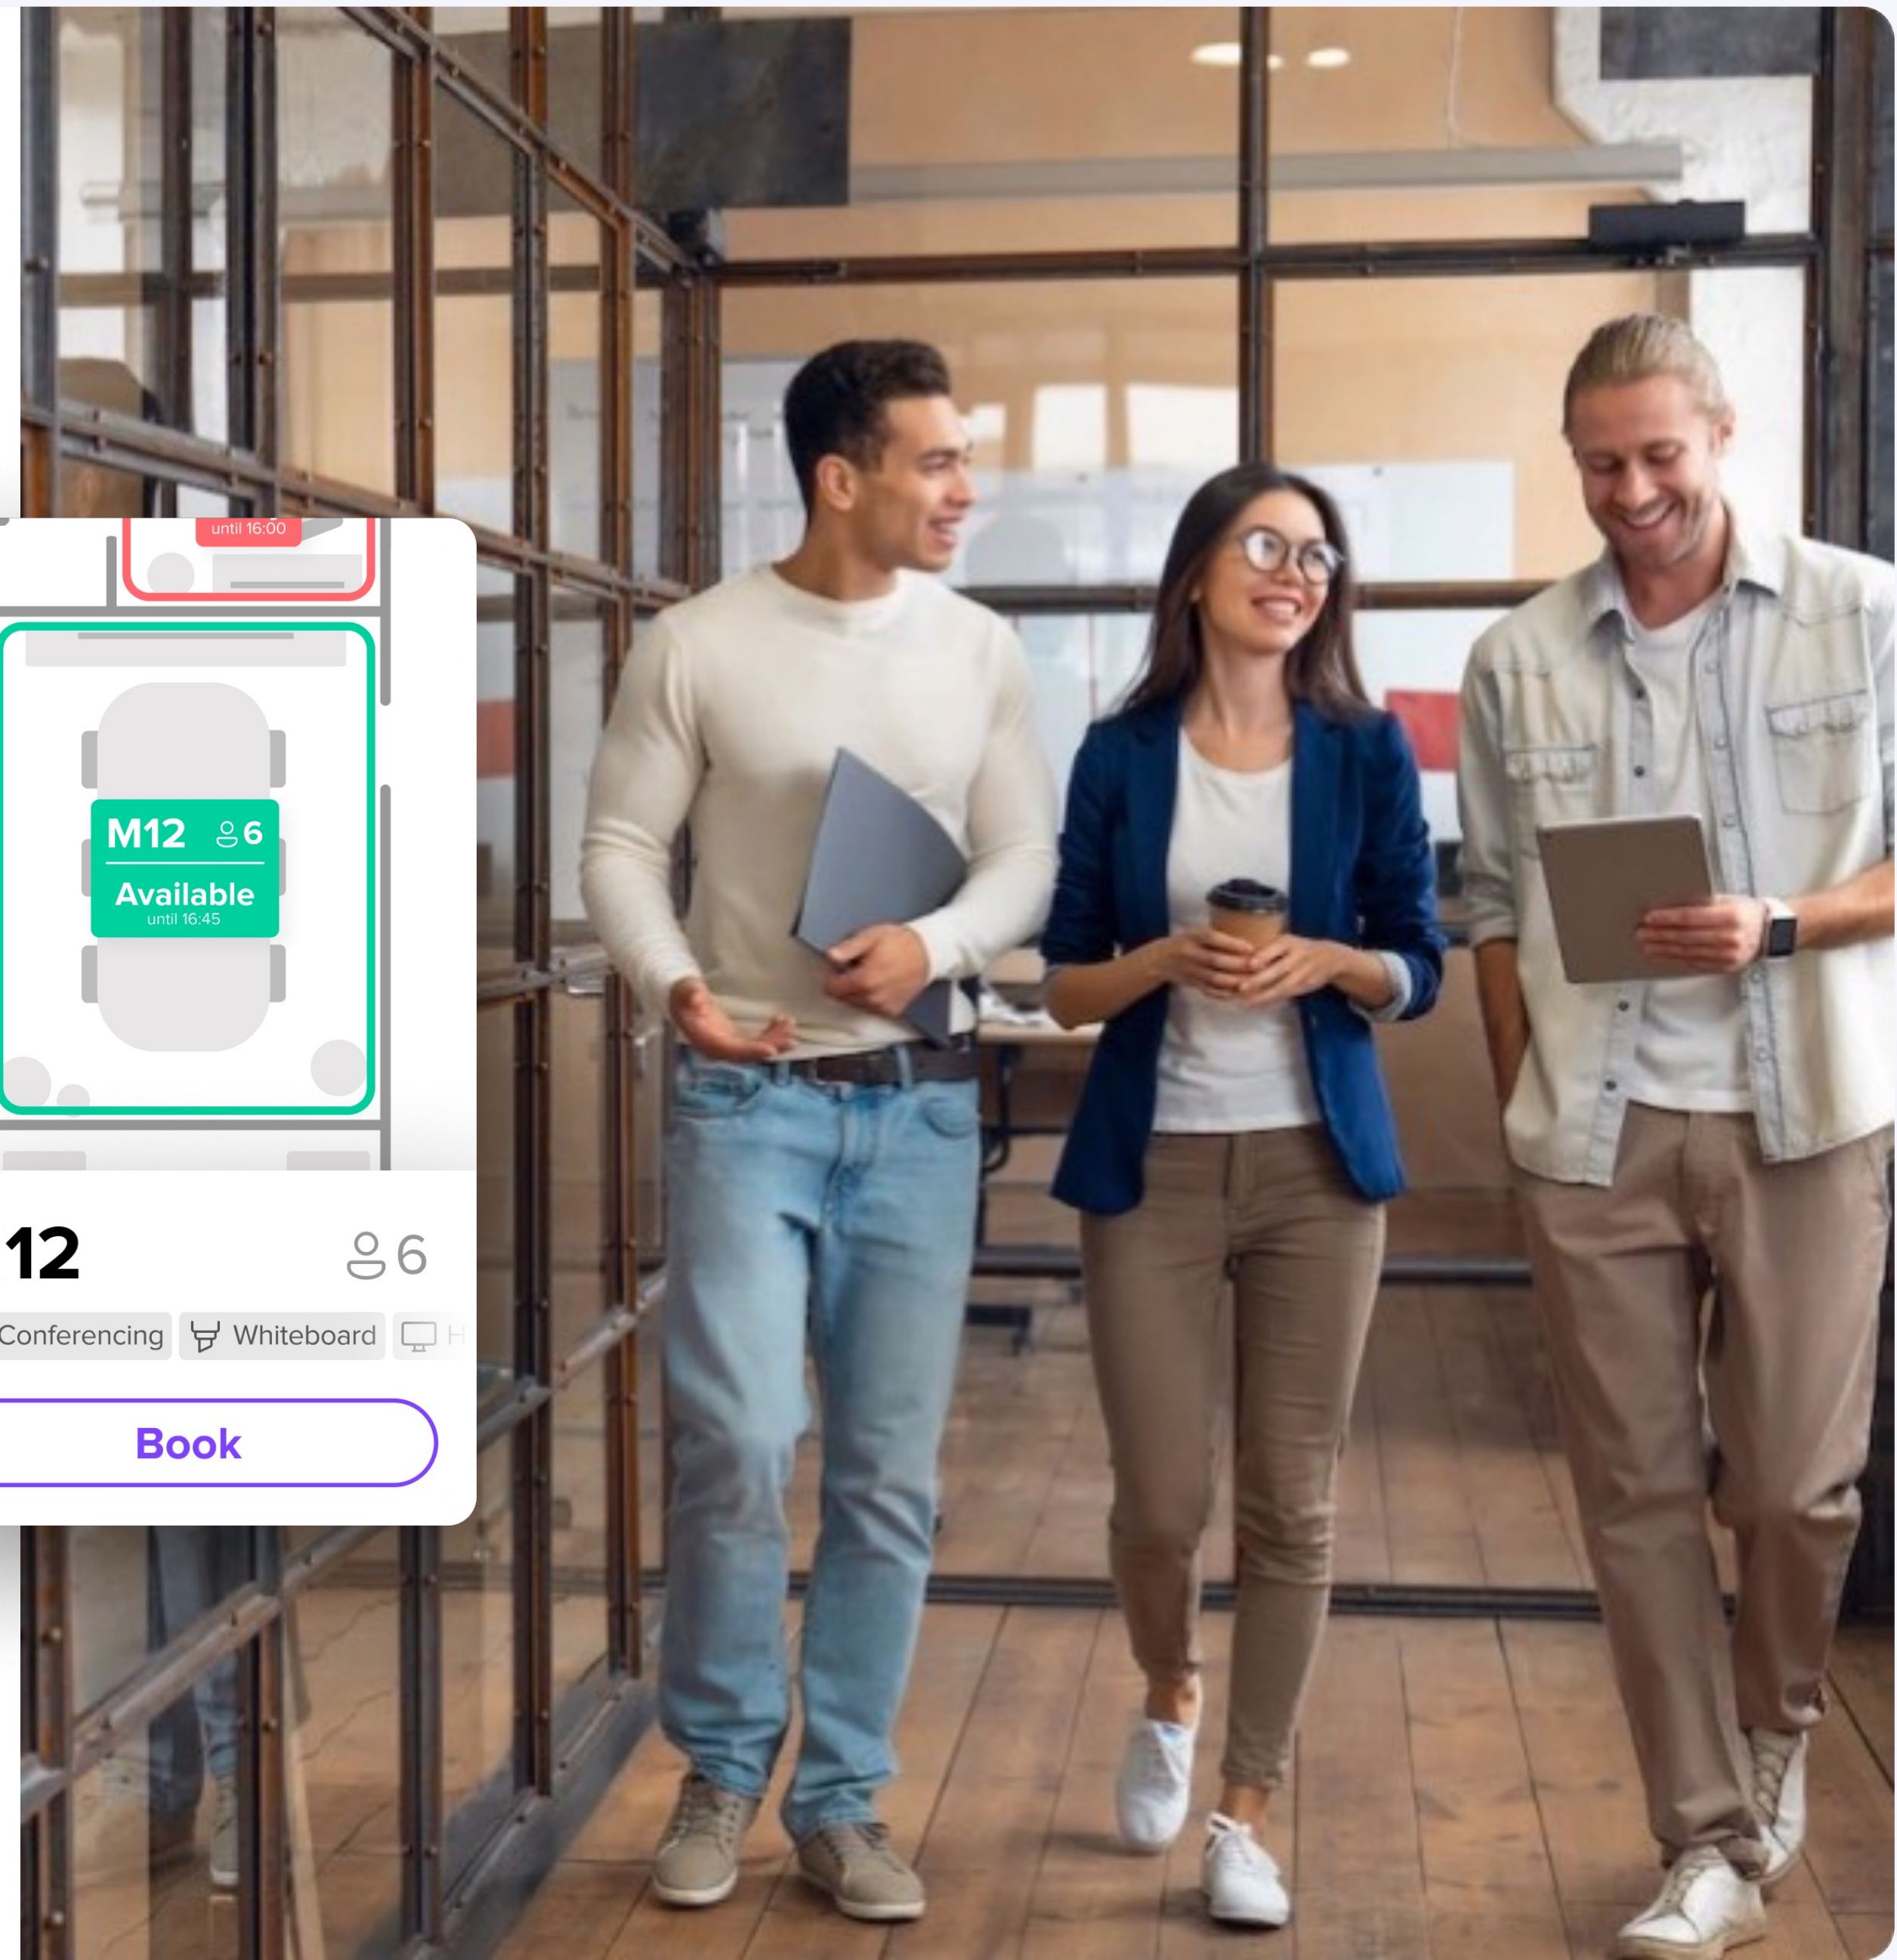

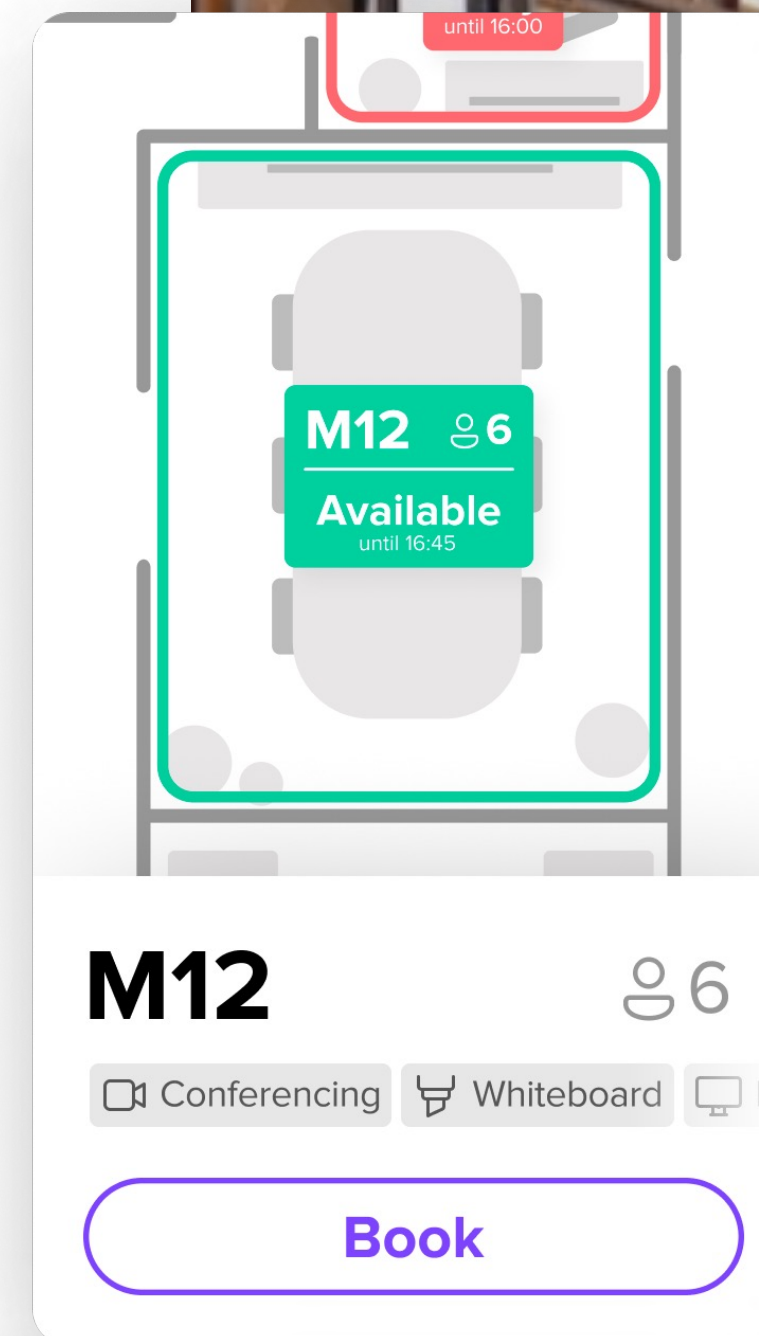

Visitor bookings

Reserve resources for external visitors and other colleagues.

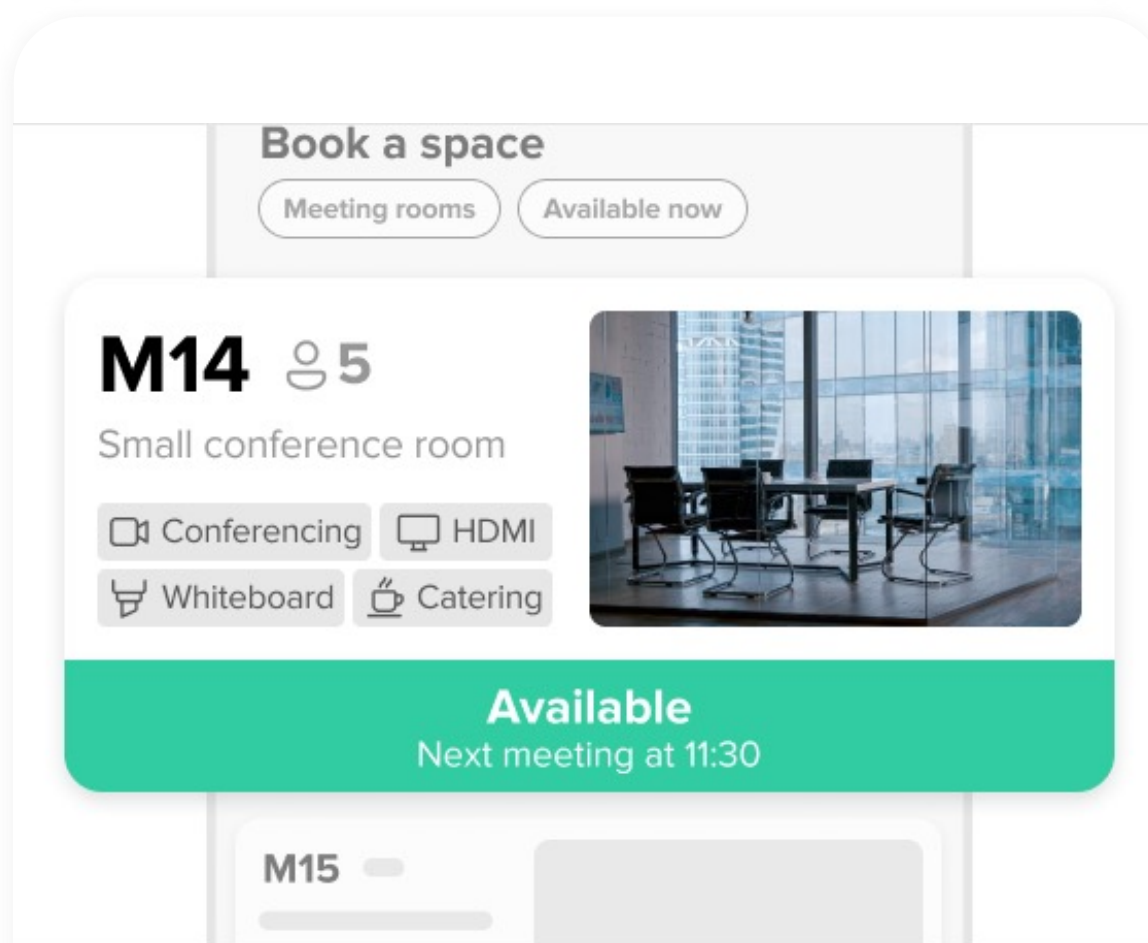

Room booking made simple

Take out the hassle and introduce a next-level booking experience. Fully integrated with Outlook and GCal.

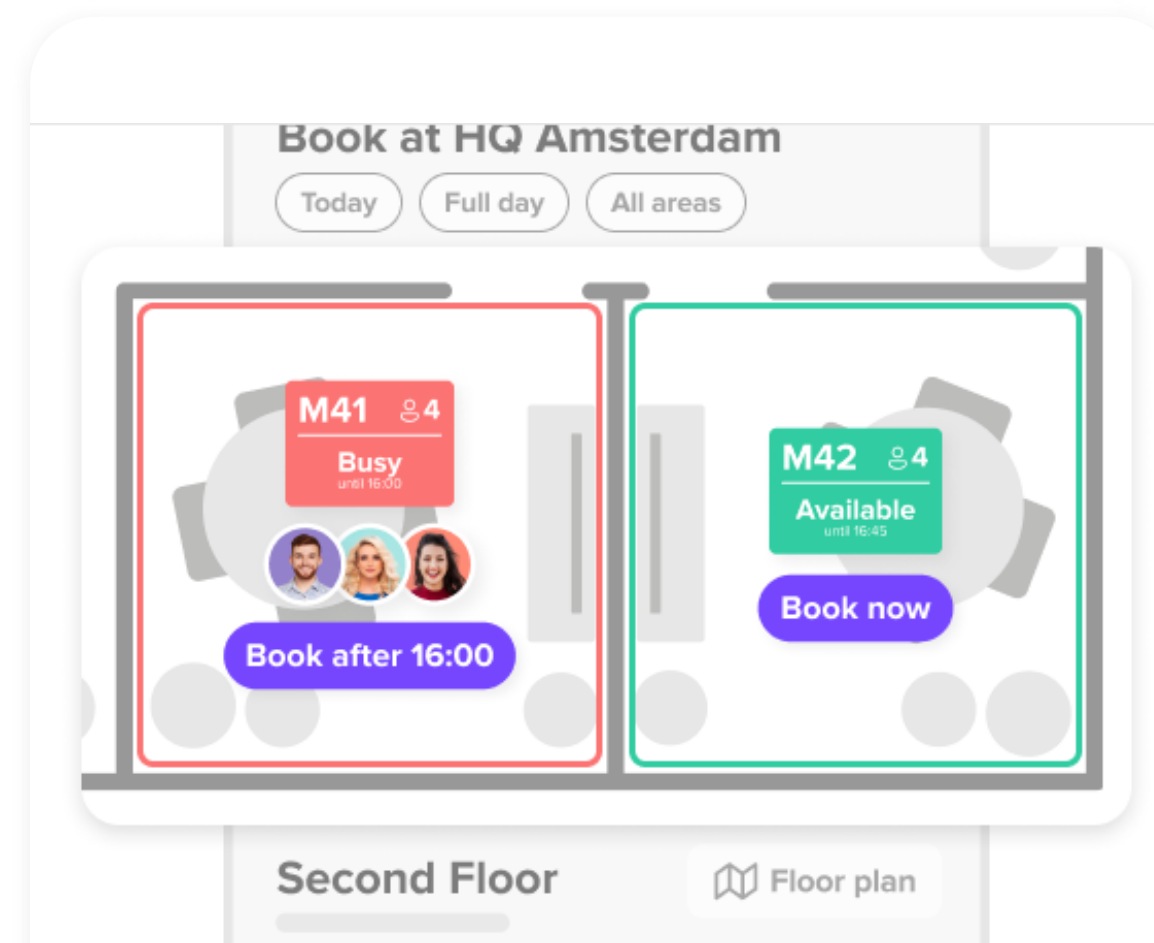

Room booking key features

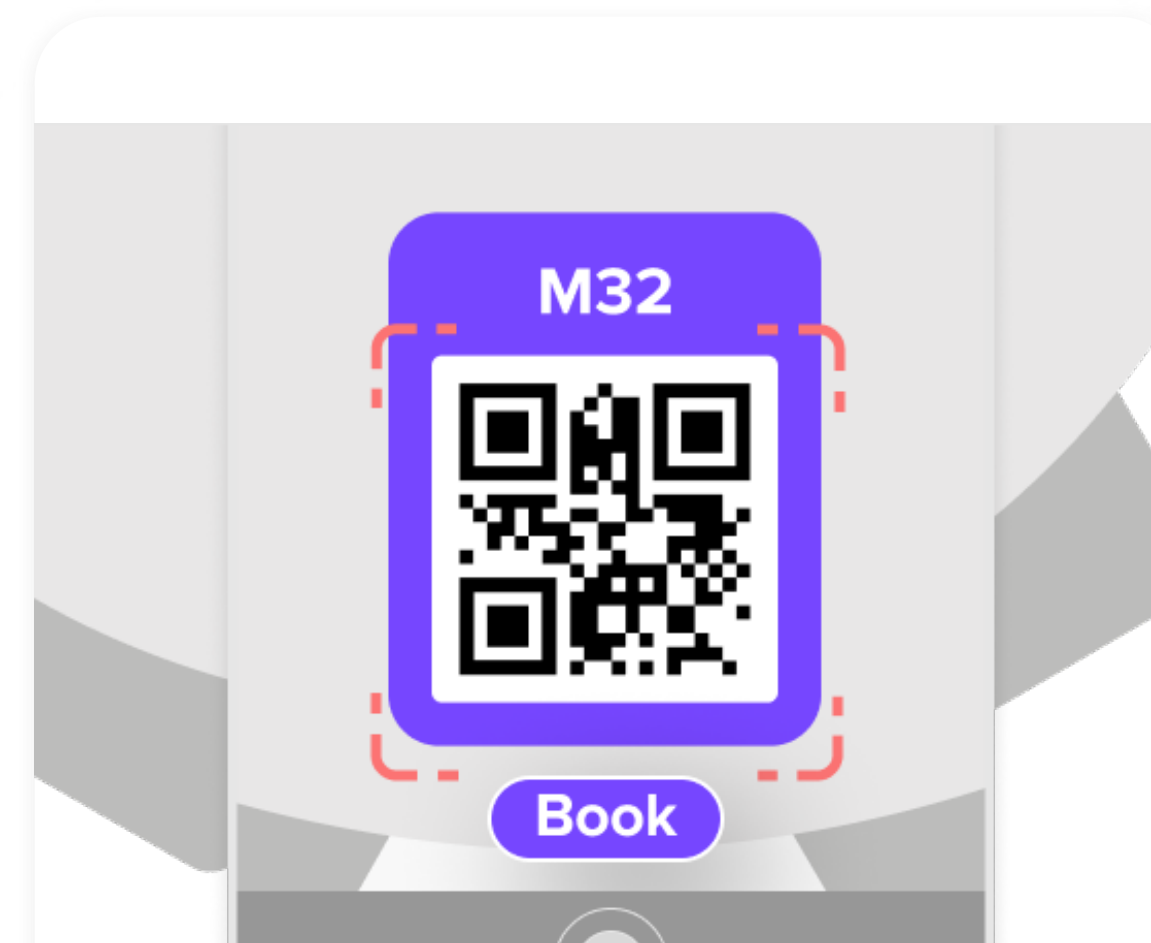

Room discovery

Search for the best-suitable meeting room for your needs based on availability, equipment, and more.

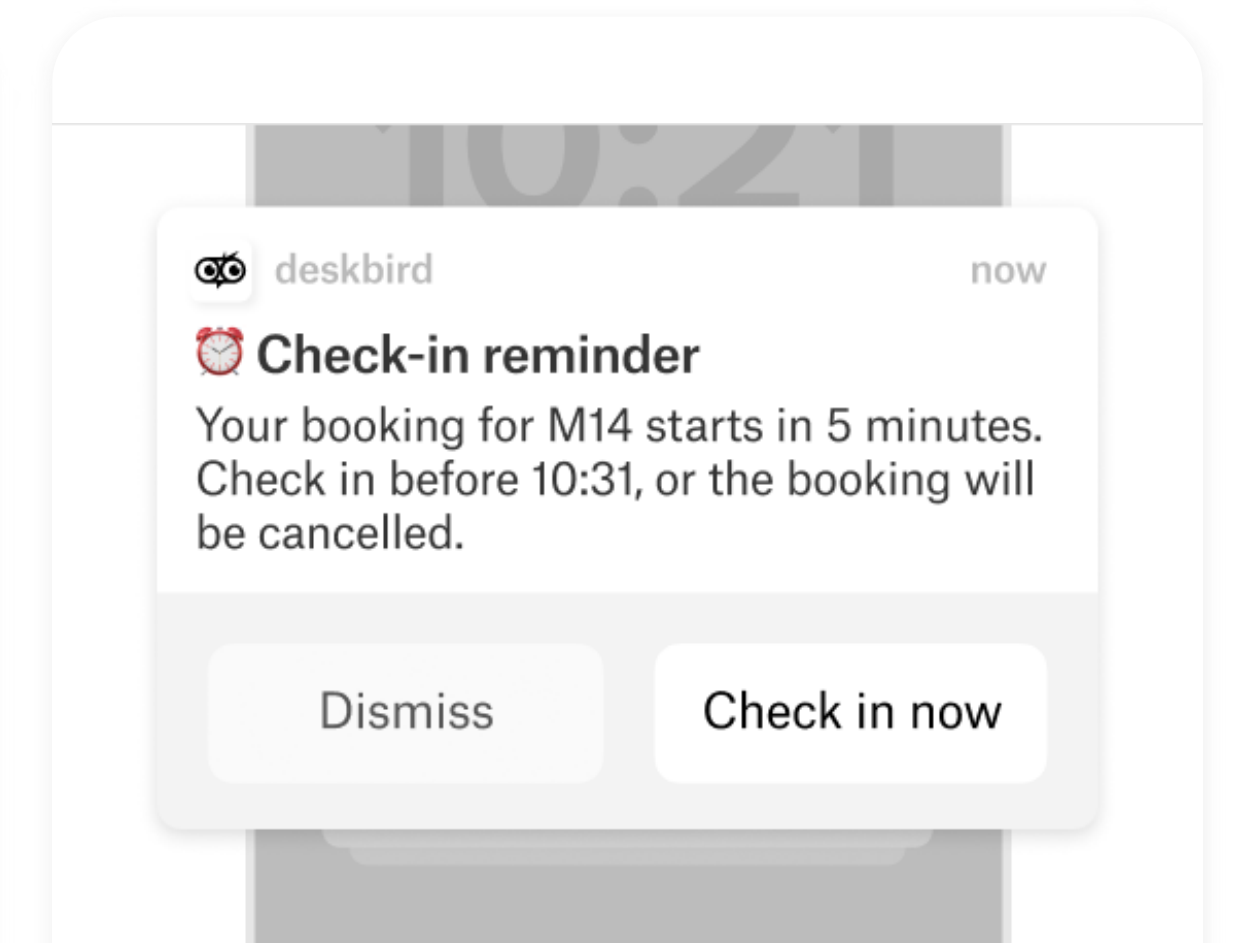

Interactive plans

Use the interactive floor plan to get a bird's-eye view of all the available rooms nearby and book them in a few clicks.

QR-Codes

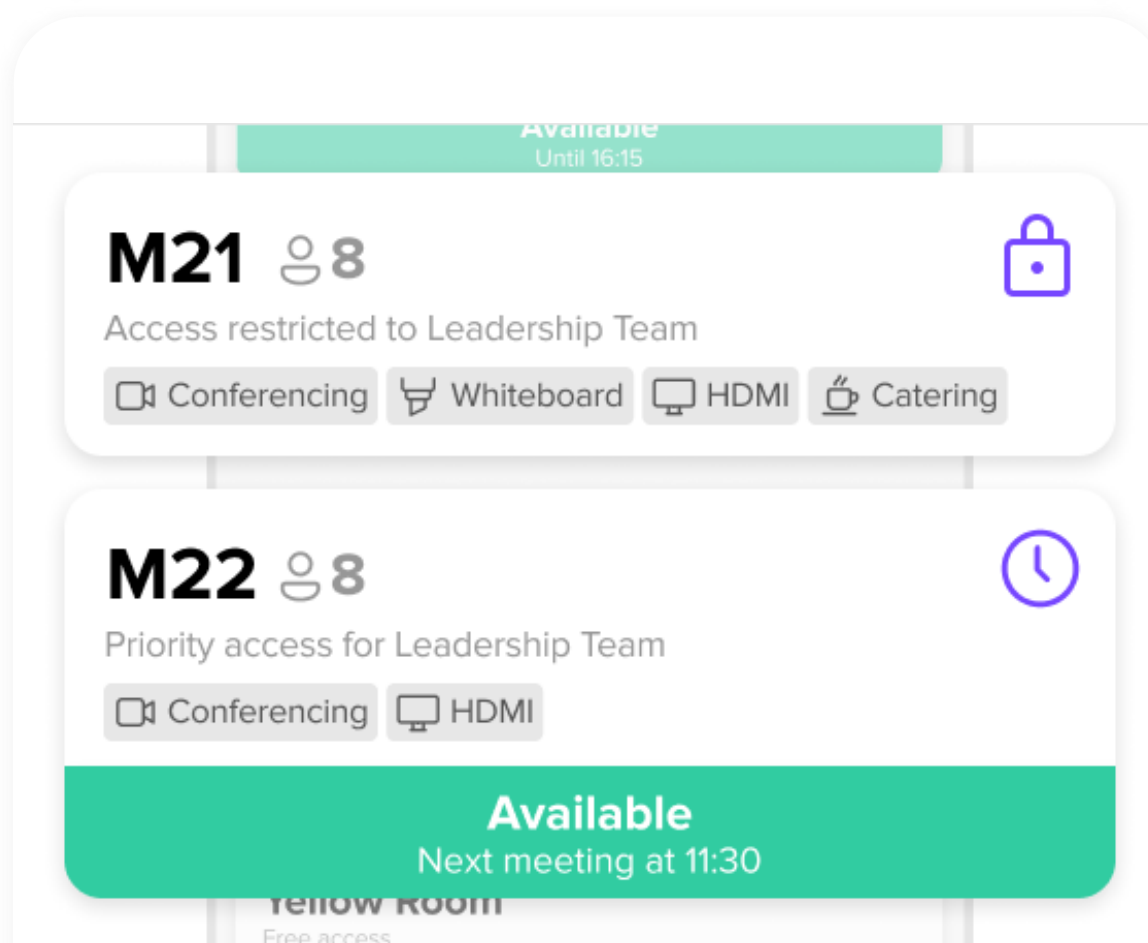

Simplify the room booking and optional check-in process by adding QR codes to your meeting rooms.

Check-ins

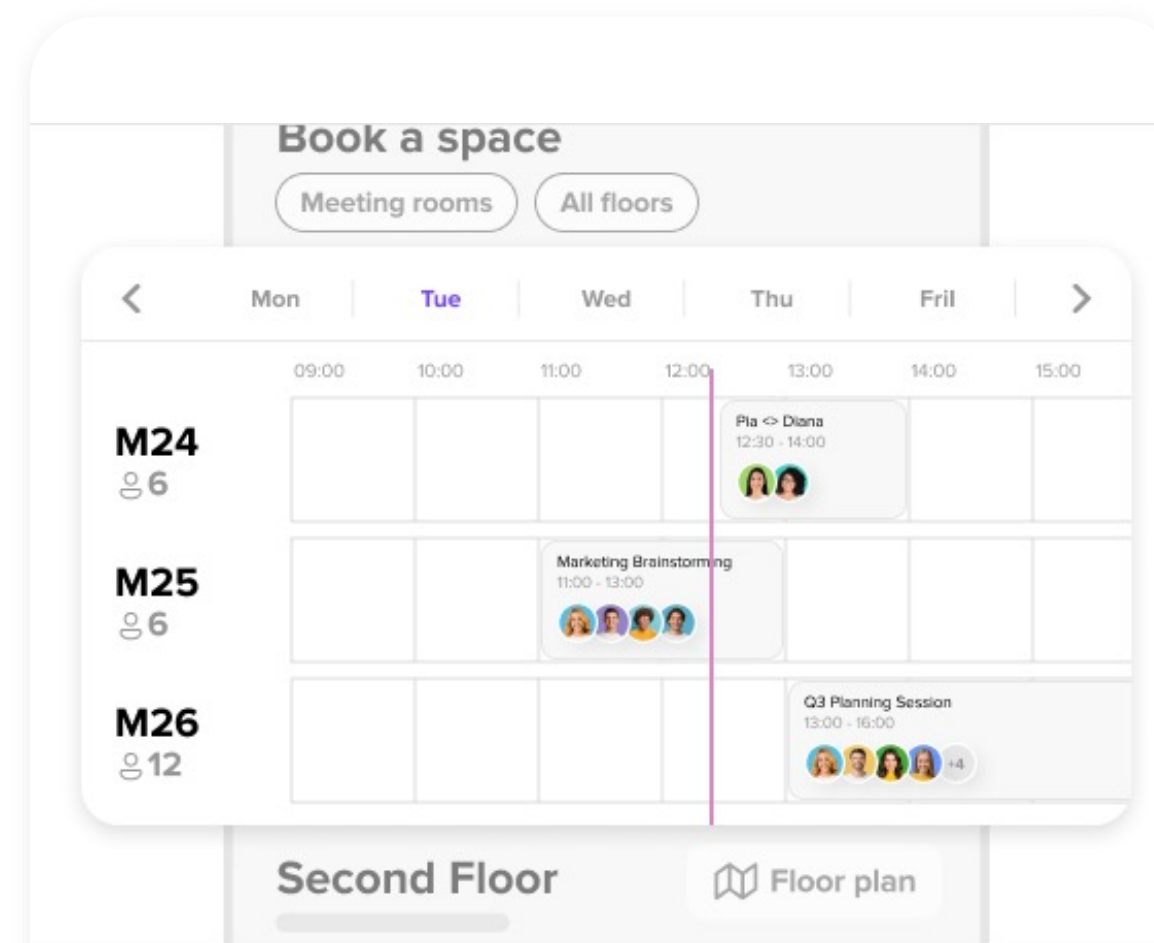

Introduce check-ins to avoid booked meeting rooms remaining unused while other people need them.

Room booking key features

Priority spaces

Make the most of your space by giving individuals priority access to specific rooms while letting others book them as a second priority.

Room admin

Get a simple overview of availabilities across all your meeting rooms, and book on behalf of others.

Further room booking features

Private meetings

Confidential meetings can be kept private.

Recurring meetings

Easily set up a recurring booking for regular meetings.

Meeting links

Directly send out a meeting link to remote participants.

Invite other users

Users with specific roles are able to book for others.

Servicing of rooms

Include additional requests to your booking, such as catering.

Native mobile apps

Available for Android and iOS.

 **Week Planning**

Make people love coming to the office

Give employees a simple tool to see who's in and what's happening in the office. Bye-bye, lonely office days. Hello, vibrant workplace!

Week planning key features

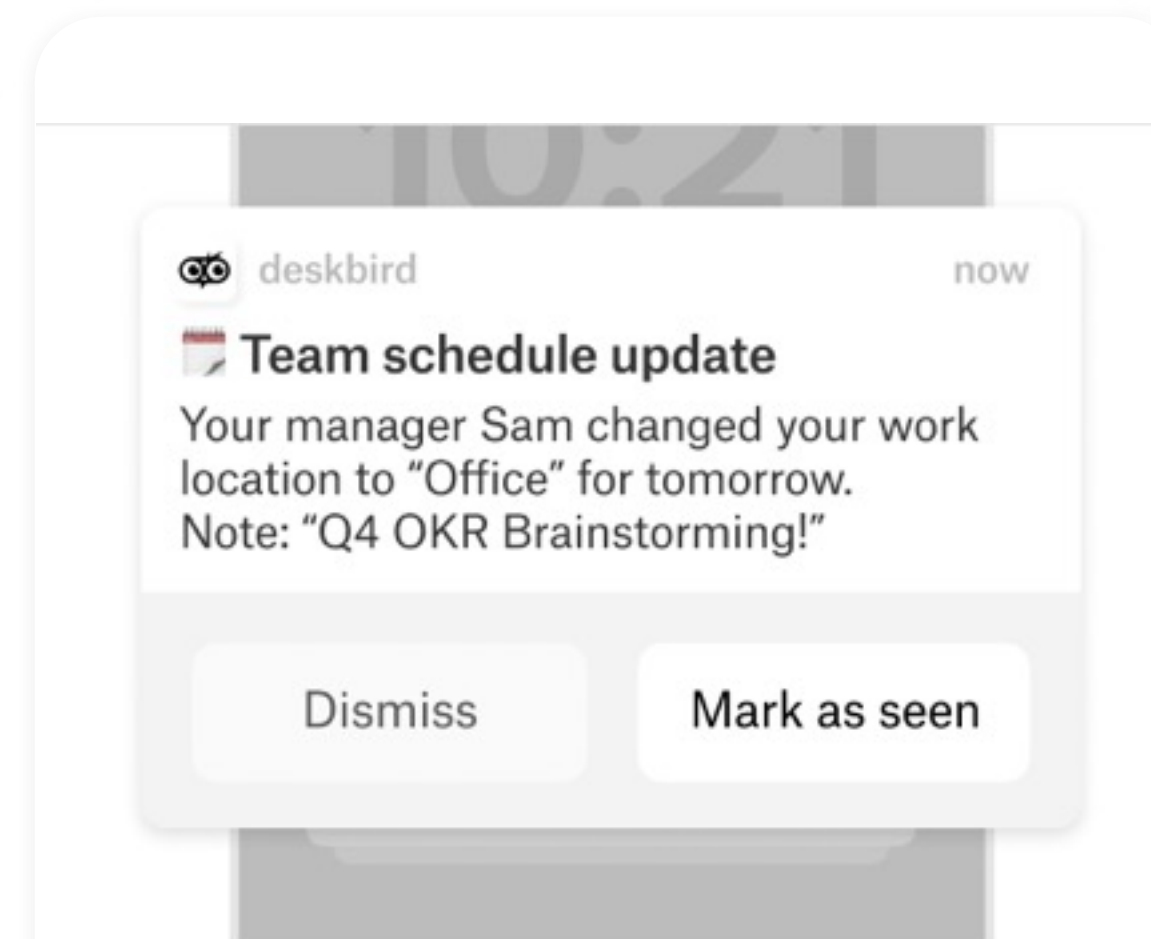

Following

Need to collaborate with your whole team for a project? Simply follow your colleague or team to stay up-to-date on their schedule.

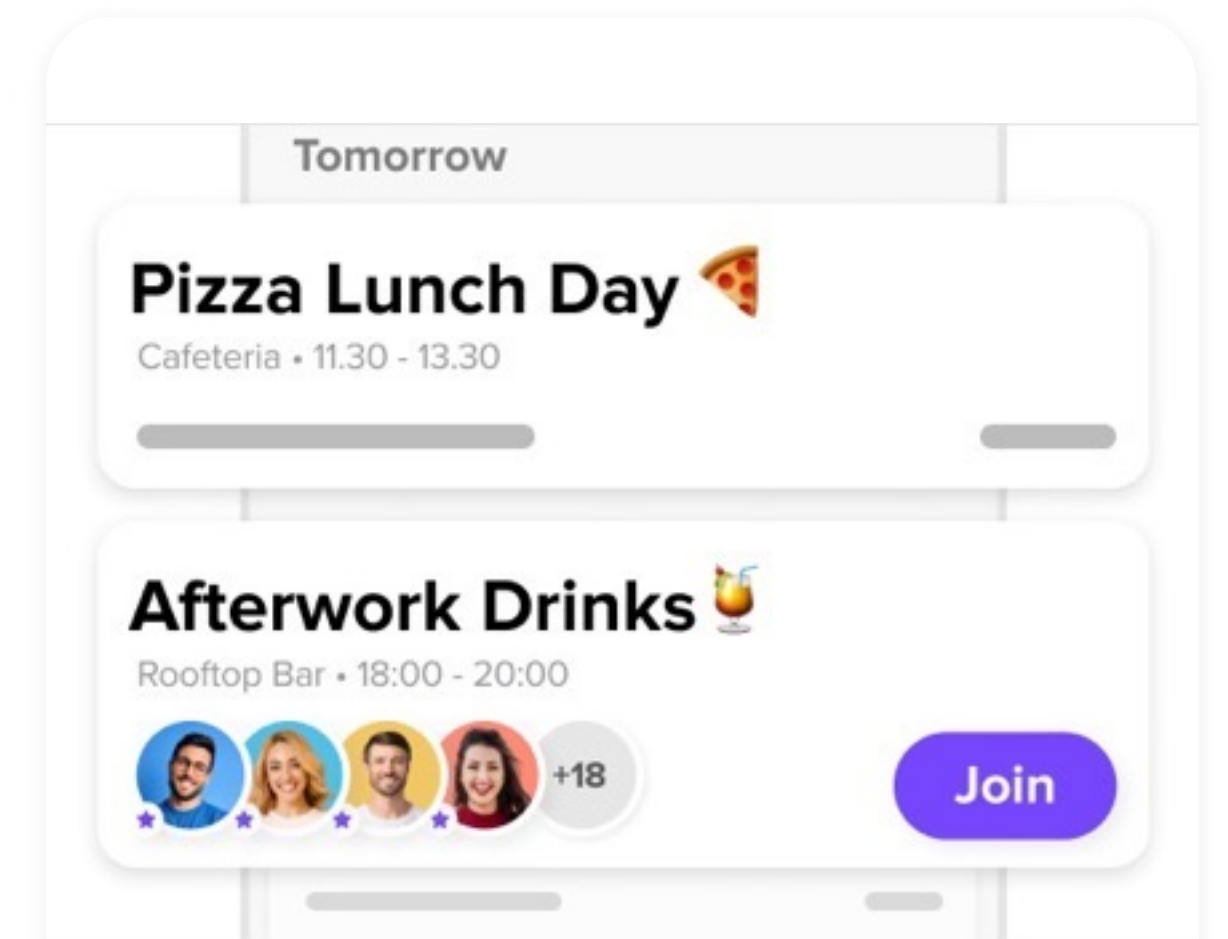

Team planning

Enable teams to coordinate weekly schedules, ensuring everyone comes in on the same days.

Notifications

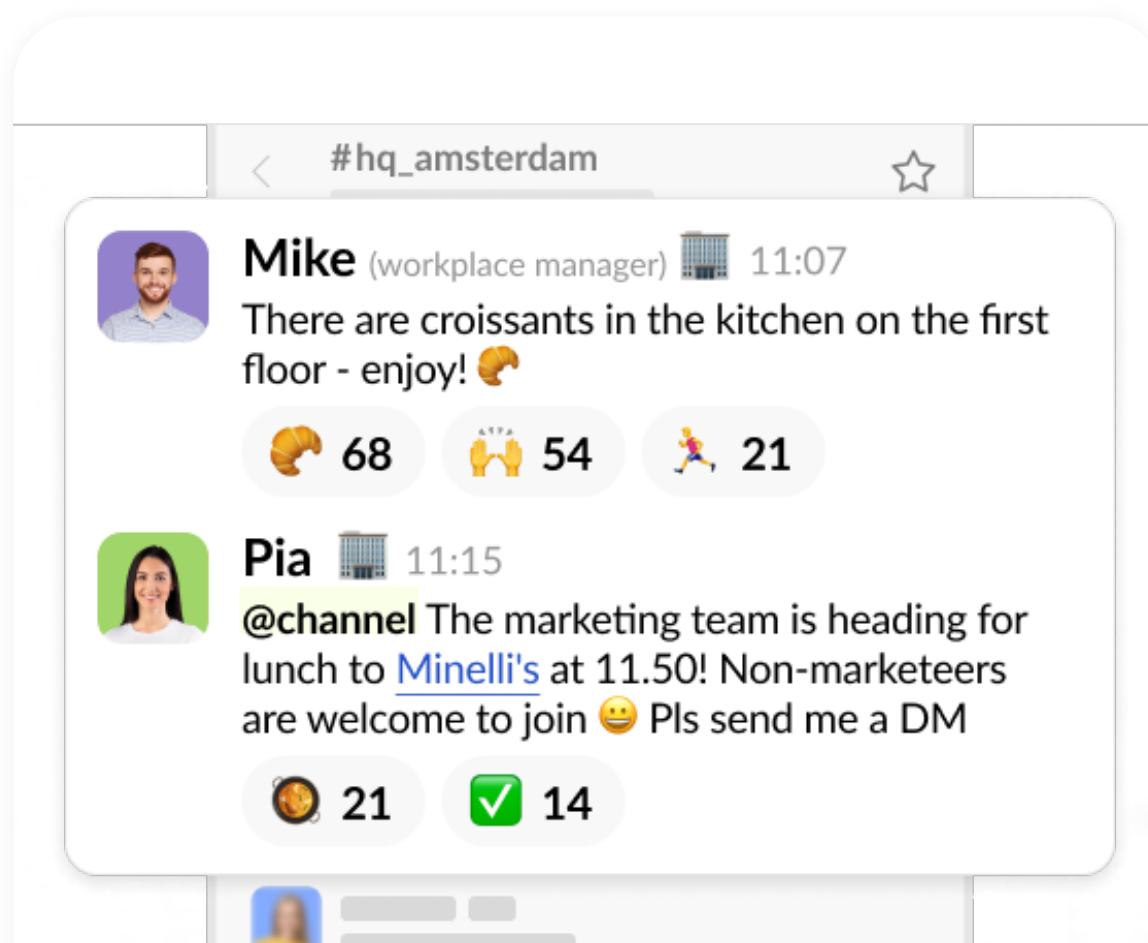

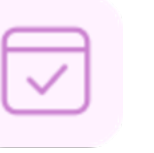

Get notified of relevant updates based on your and your team's actions and external occurrences.

Office events

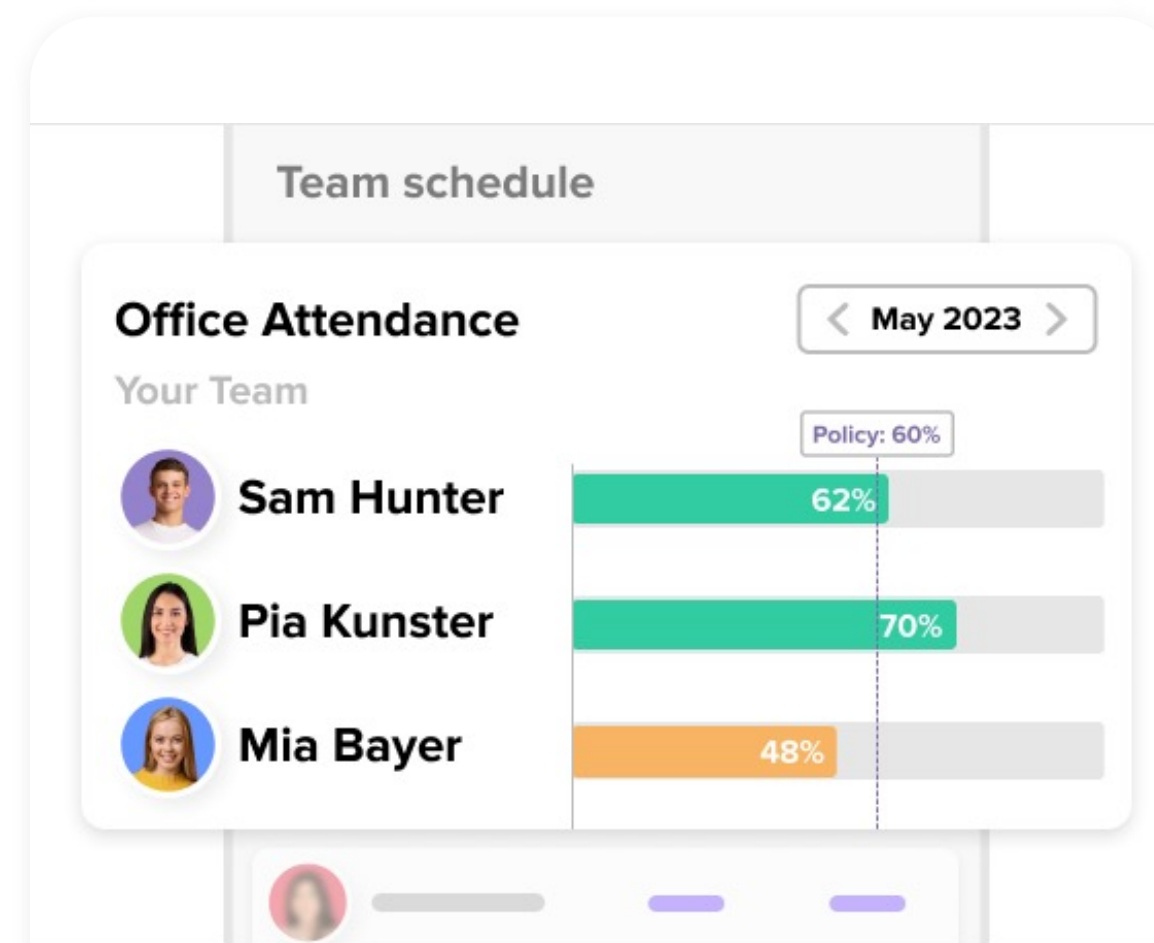

The Week Planning feature displays upcoming office events, allowing employees to come in on lively office days.

Week planning key features

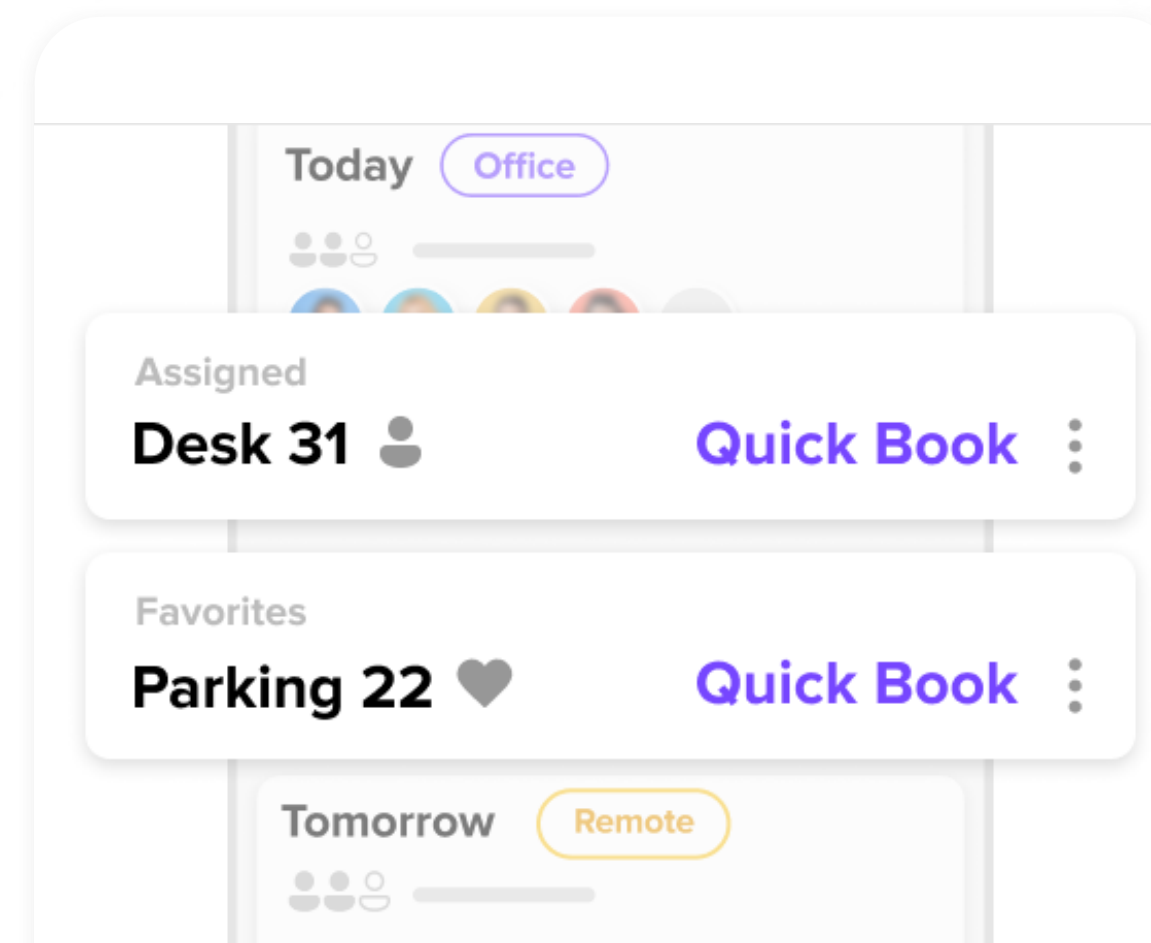

Office channel

A new Slack channel is created and updated automatically to enhance communication among colleagues in the office.

Hybrid policies

Create custom hybrid office guidelines tailored to your company and oversee employee compliance.

1-click bookings

Planning your work week is now easier than ever. Book assigned and favorite office resources in just one click.

Further week planning features

Social sharing

Share your weekly work schedule with colleagues or your team.

Recurring schedules

Create recurring schedules that can be applied to multiple weeks.

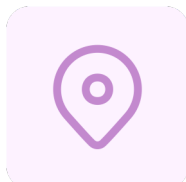

Resource releases

Working from home? Let your colleagues book your fixed desk.

Native mobile apps

Native app available for Android and iOS users.

Custom work locations

Define available work locations based on your specific needs.

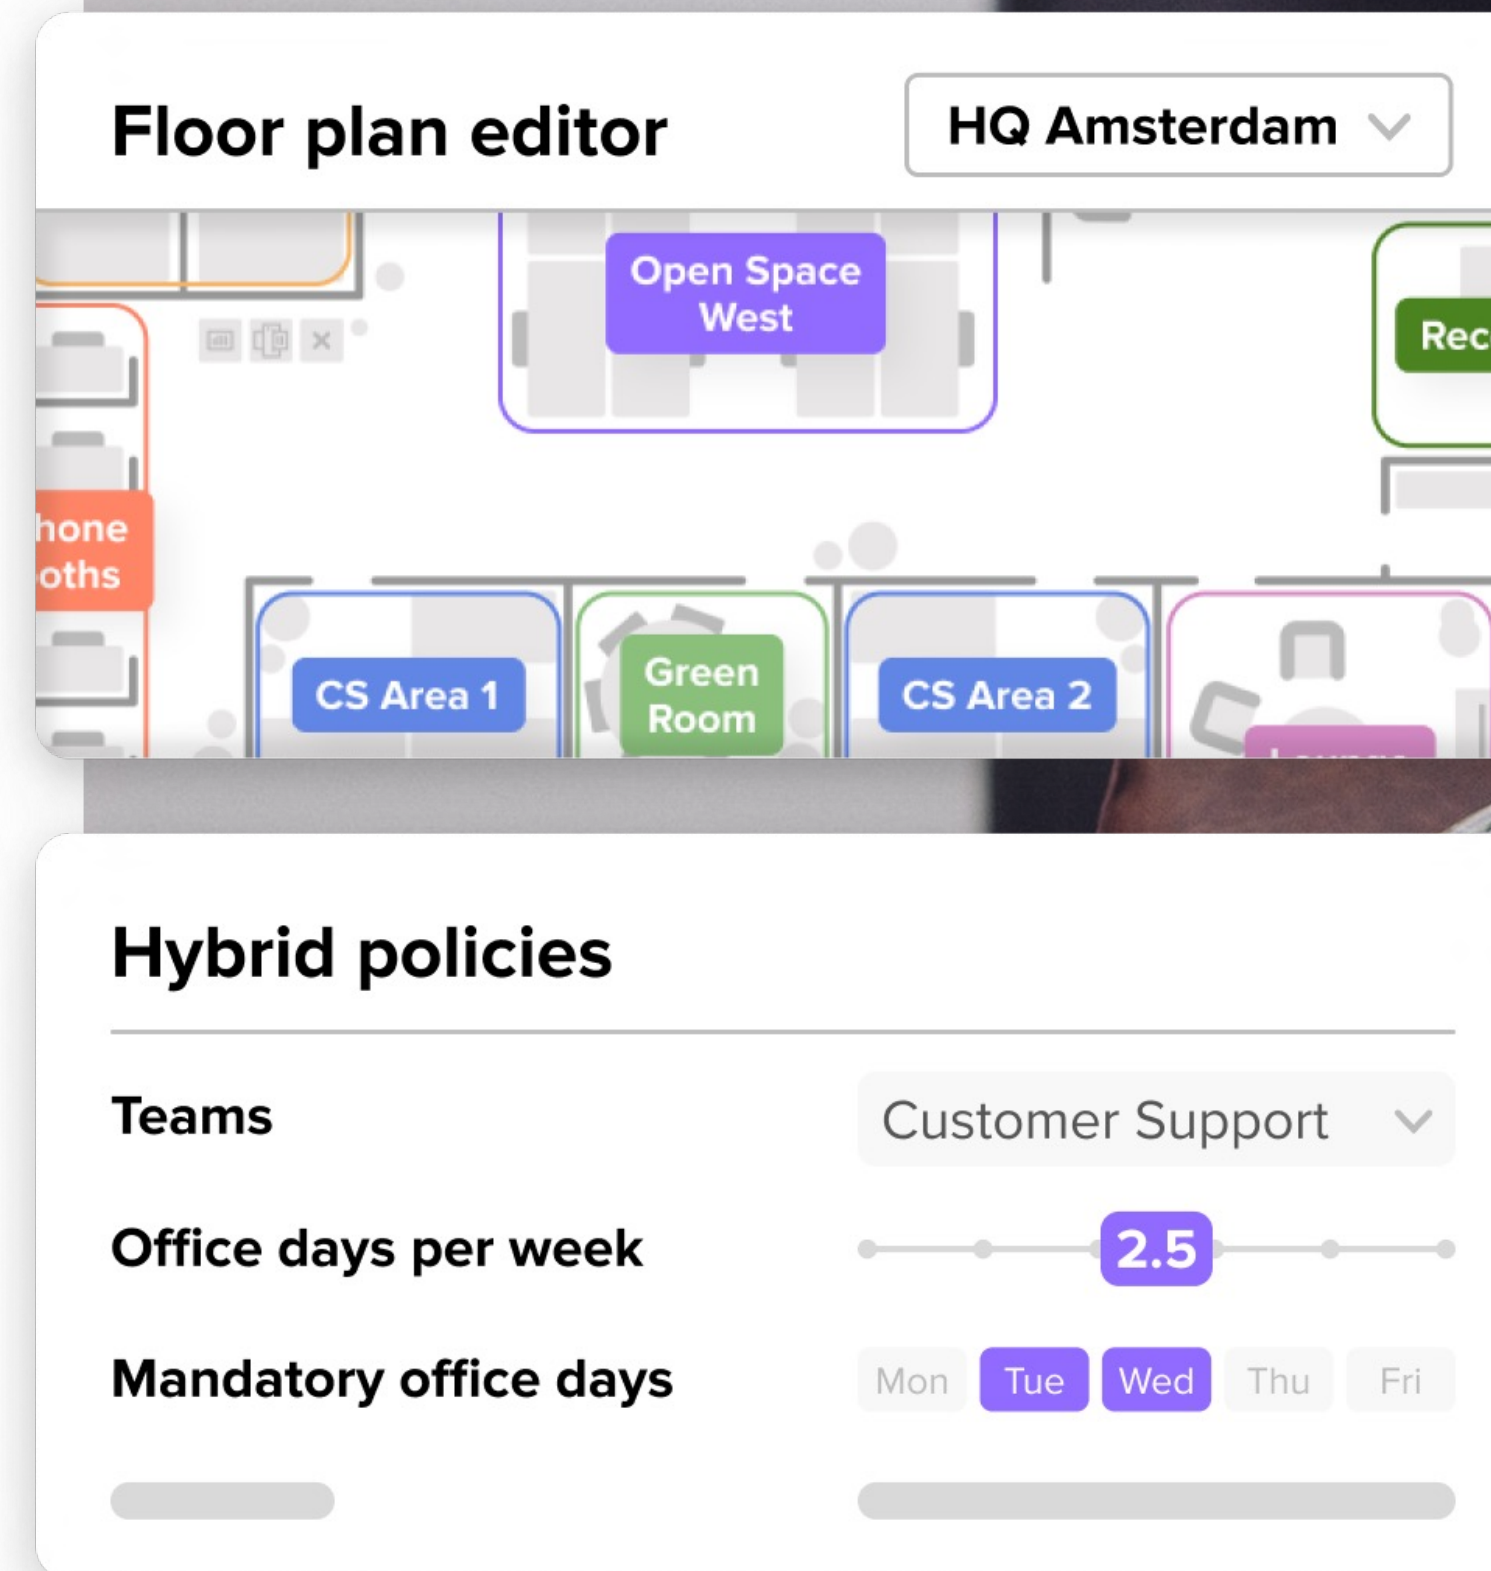

Team overview

Get an easy overview of your teams' and colleagues' schedules.

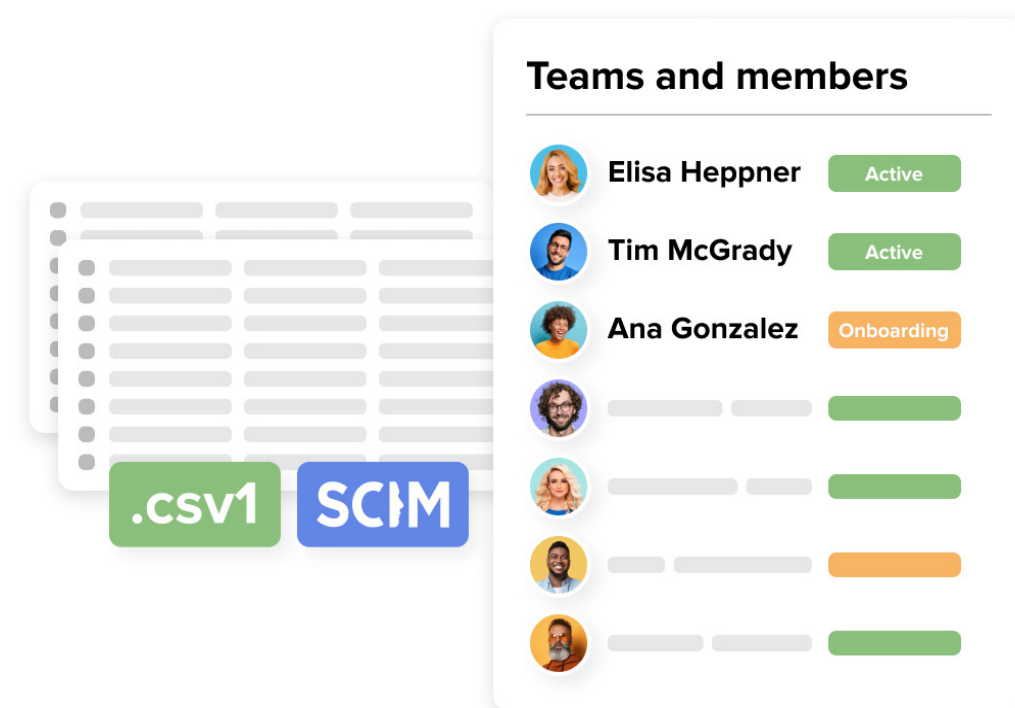

Configuring the office with ease

Set up the flexible office within a few minutes. From floor plan editing to user management and access rights, everything is controlled in one place by the admin, and no external support is needed.

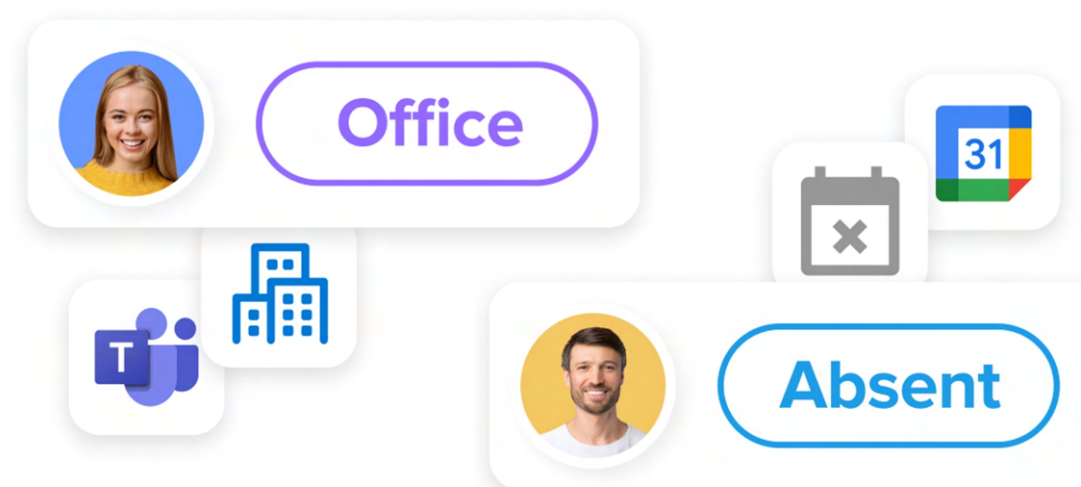

Admin portal key features

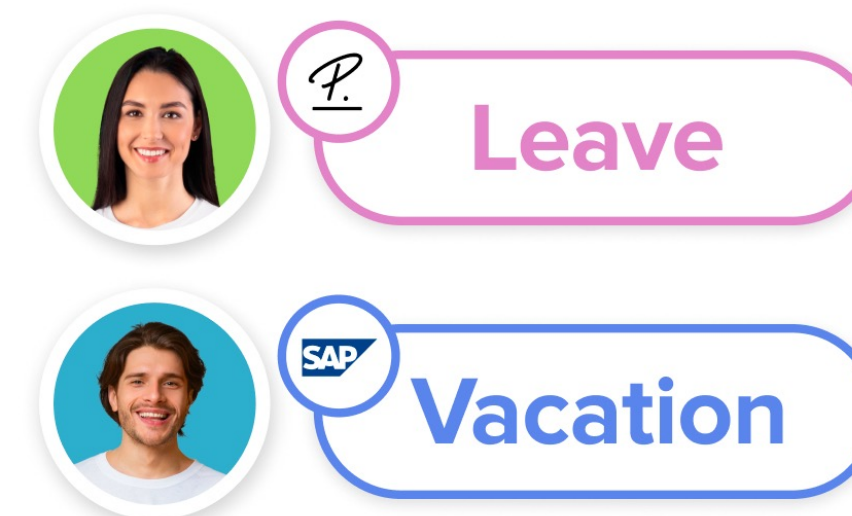

User provisioning

Choose between the automatic provision of users through SCIM or CSV1. Besides, users can always be added manually as well.

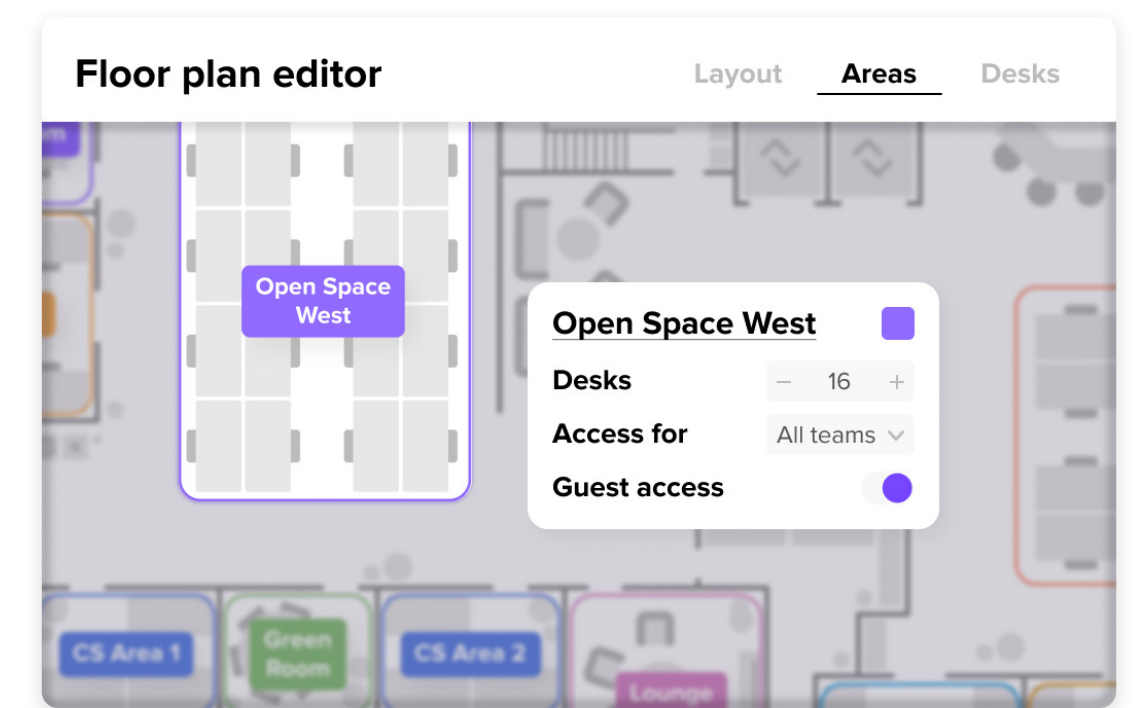

Calendar sync

Synchronize room bookings with Office 365 and Google Calendar bi-directionally, ensuring events are up-to-date everywhere.

HRIS integration

Integrate with your HRIS tool to automatically synchronize absences that were approved in your HRIS tool.

Floor plan editor

Create designated areas, add or delete desks, and relocate them as needed with the intuitive, drag-and-drop floor plan editor.

Workplace decisions based on data, not feelings

Create a better workplace by analyzing precise data on office consumption and team behavior. And with deskbird by your side, you can directly convert data into actionable improvements.

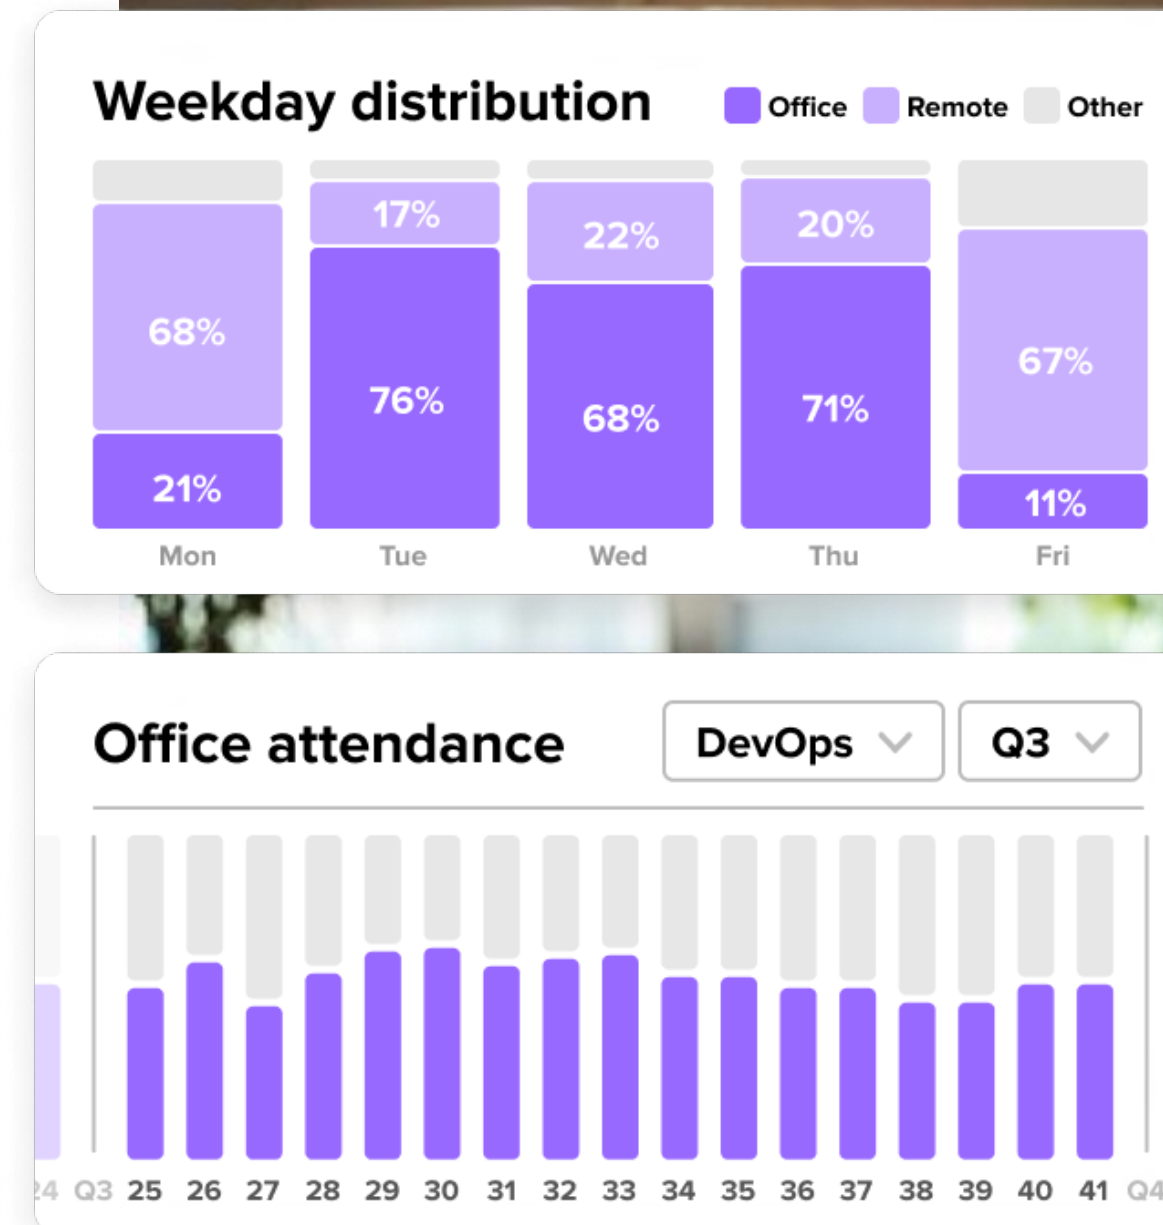

Powerful data for your workspace strategy

How much office space do we need?
Do we have enough desks? Stop taking office decisions based on gut feeling. deskbird provides you with all the data you need.

Measure hybrid success

Get full transparency on your teams' office behavior and track if hybrid office policies are being lived in practice - fully compliant with European GDPR.

Further analytics features

Role-based access

Assign different admin roles on a need-to-know basis - fully GDPR compliant.

Customize & export

Export the data you need in CSV format to create custom reports.

Holistic analytics view

Understand utilization across desks, rooms, parking spots, and more.

Hybrid policy monitoring

Keep track of your teams' compliance with your hybrid office policies.

Dynamic Spaces

Introducing Dynamic Spaces

Stop wasting money on energy and cleaning on days with low office occupancy. Save up to 30% on ancillary cost by dynamically limiting the bookable workspaces in deskbird. Start today.

Dynamic Spaces

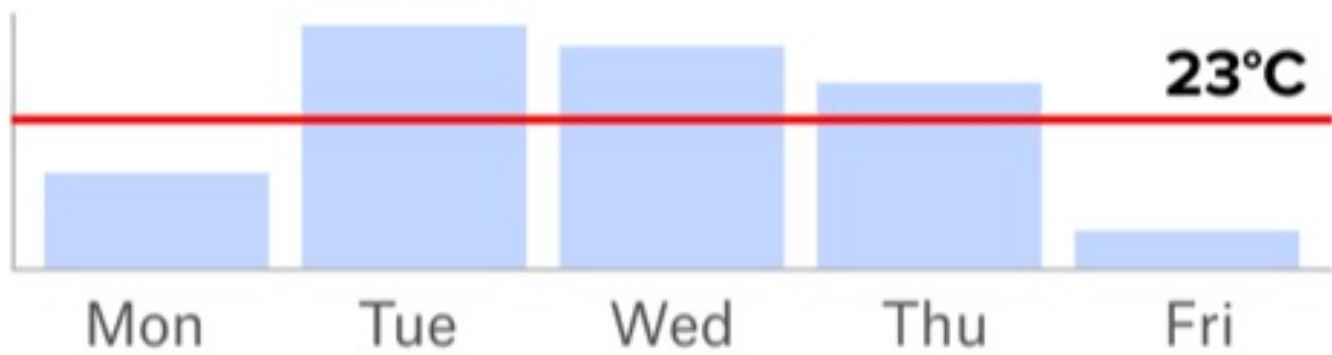

Monthly saving potential:

€90'000

Save up to € 150 per employee and year with deskbird Dynamic Spaces

Second floor: Occupancy and Room Temperature

PROBLEM

Over-servicing spaces

Offices are heated, illuminated and cleaned uniformly throughout the week, but daily office occupancy is highly volatile. 30% of office ancillary cost is spent inefficiently. For a 10'000-people company, this equals to an overspend of € 1.5 million per year.

💡 Low occupancy

Second floor on Fridays over last 3m (<10%)

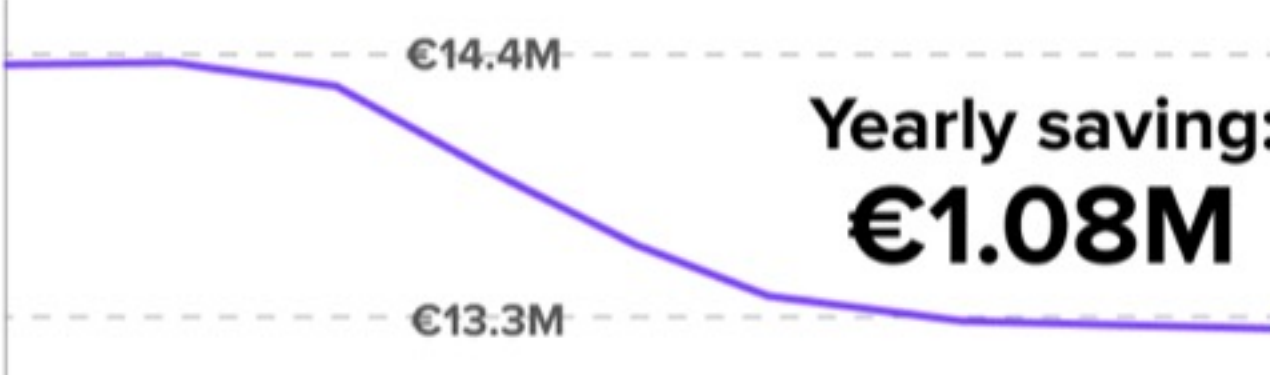

Close area for these days

SOLUTION

Control office supply

Based on deskbird data, we identify utilization patterns throughout the week. We help you to dynamically adjust the available office resources and areas to match the expected office demand, laying the foundation for a more efficient and lively office space.

Ancillary costs

IMPACT

Save € 150/employee

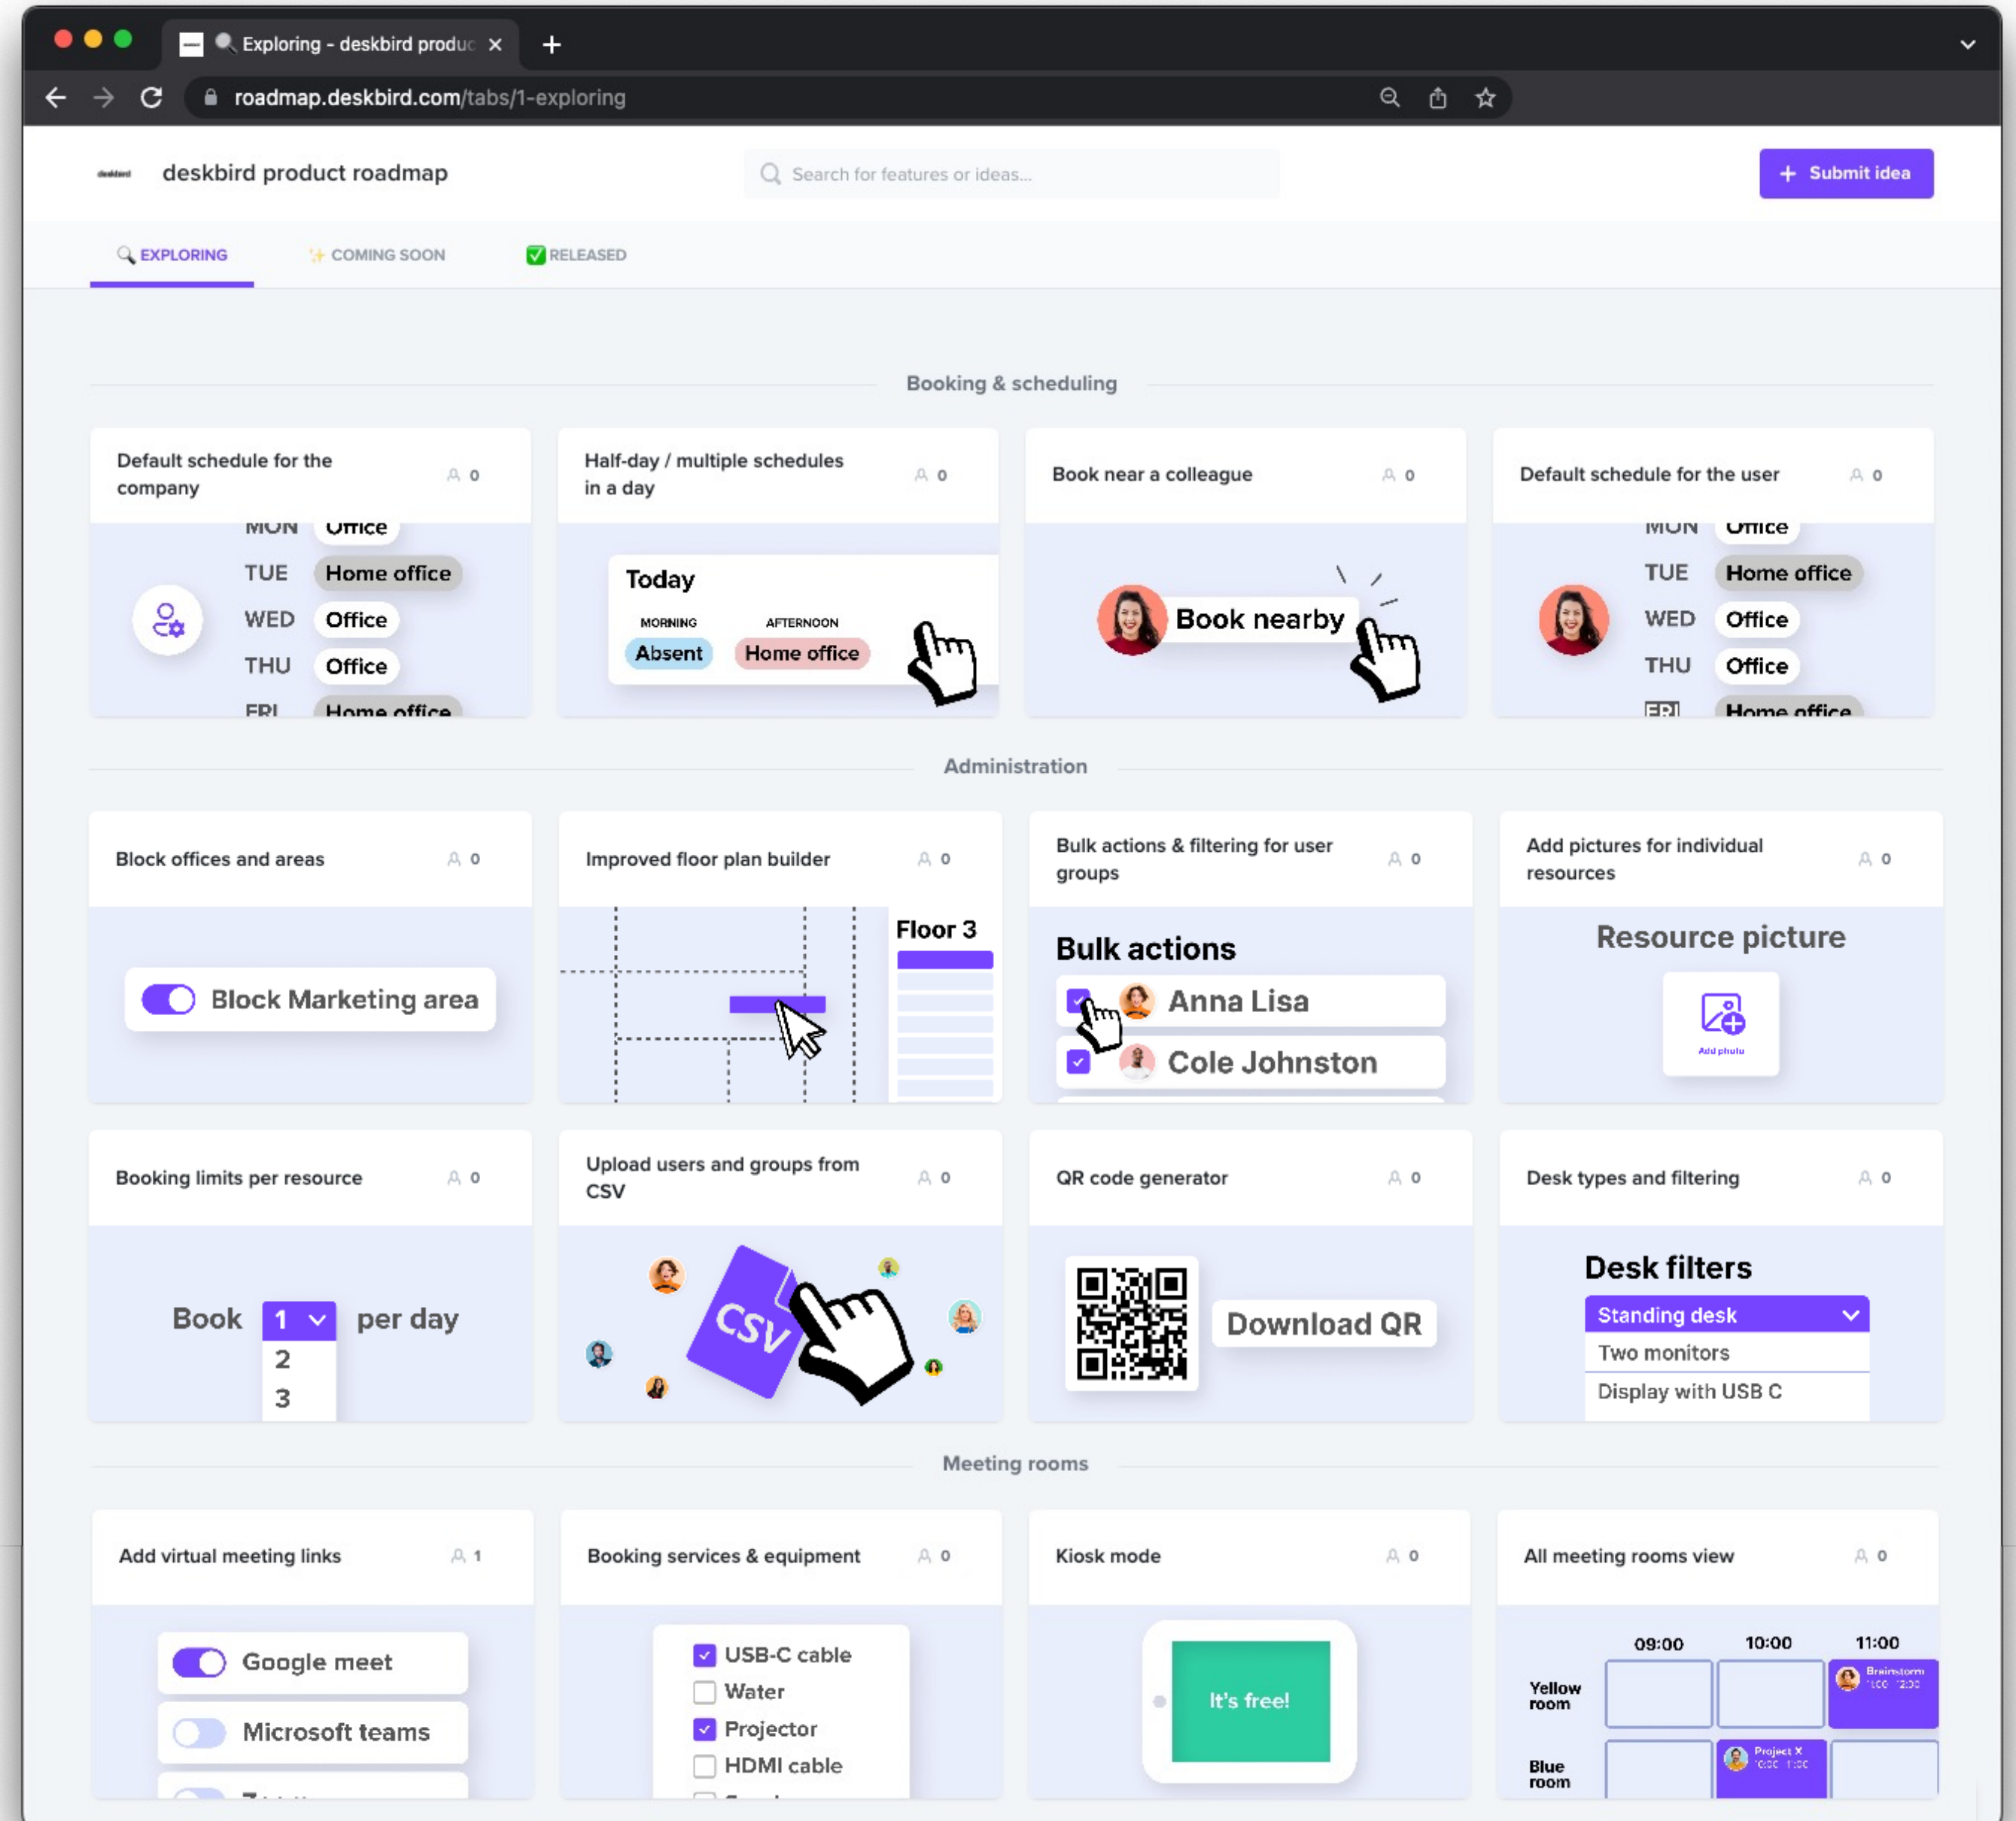

Companies immediately reduce their office ancillary cost by up to 30%, based on smarter heating, cleaning, canteen planning, etc. This equals yearly savings of up to € 150 per employee. Additionally, companies create more lively and more sustainable workspaces.

Product Roadmap

Exciting features are yet to come

[Check Roadmap](#)

Why deskbird

deskbird takes any office to the next level, with a ROI beyond 'just' costs

30%

Savings of energy and cleaning costs

With deskbird, floors and buildings can be temporarily excluded from booking and must therefore not be air-conditioned (e.g., during low occupancy). Additionally, based on booking data, cleaning and maintenance can be planned and carried out in a needs-oriented, predictive way.*

40%

Reduction of employee resignation

Meeting colleagues in the office promotes satisfaction and loyalty. Seeing who is sitting where and when, is a prerequisite in a hybrid work environment. Employees must be able to coordinate and choose freely on which days they come to the office to build "social capital" through in-person interactions.*

+1 day

Productivity per employee per week

Collaborative, complex, or highly iterative tasks in a team can be carried out more effectively in person. For this purpose, it is important for employees to synchronize their presence so that they can be in the office when necessary and when the effort is worthwhile.*

*For coordinated hybrid work with 2-3 remote working days

deskbird will be loved by your employees – from day one

- ✓ **Mobile-first user experience**
- ✓ **Fully integrated into existing IT**
- ✓ **Helps fostering social office life**

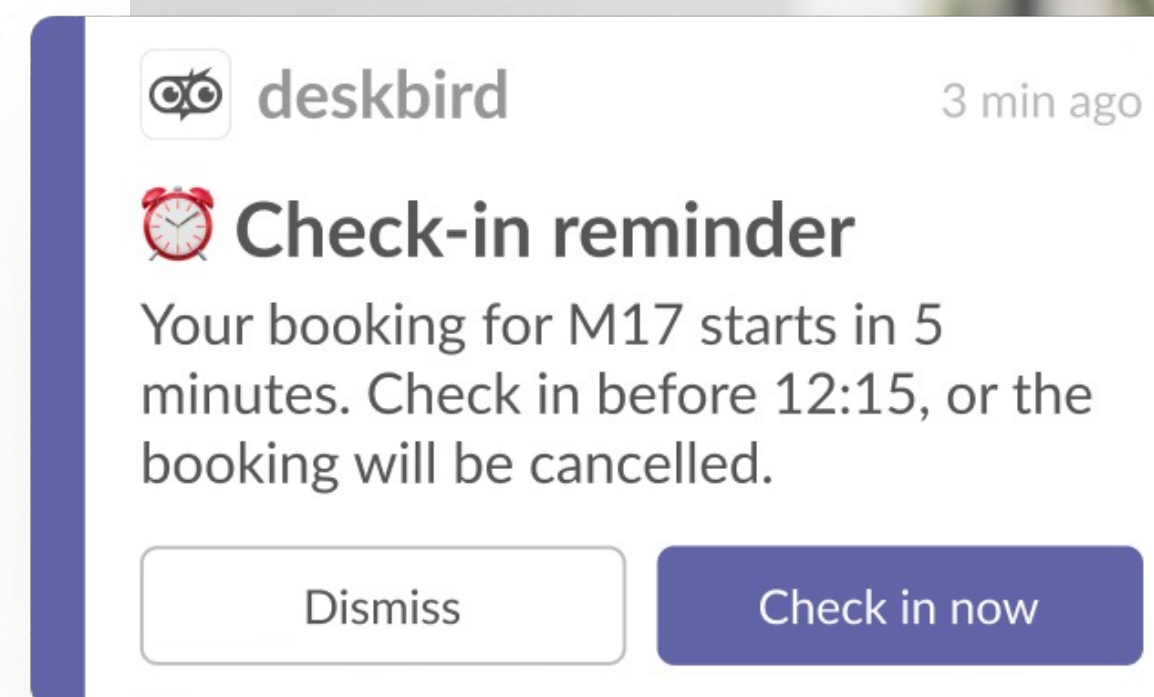

All the integrations for a seamless workspace

Native in MS Teams

Employees can seamlessly access all features within MS Teams. This ensures maximal user adoption thanks to a familiar environment without the need for yet another app.

Smart and simple in Slack

deskbird is fully integrated in Slack. Employees stay up-to-date with their bookings and never miss a check-in again, thanks to reminders. Plus, they can share their work location with colleagues, promoting collaboration.

Seamless with HRIS

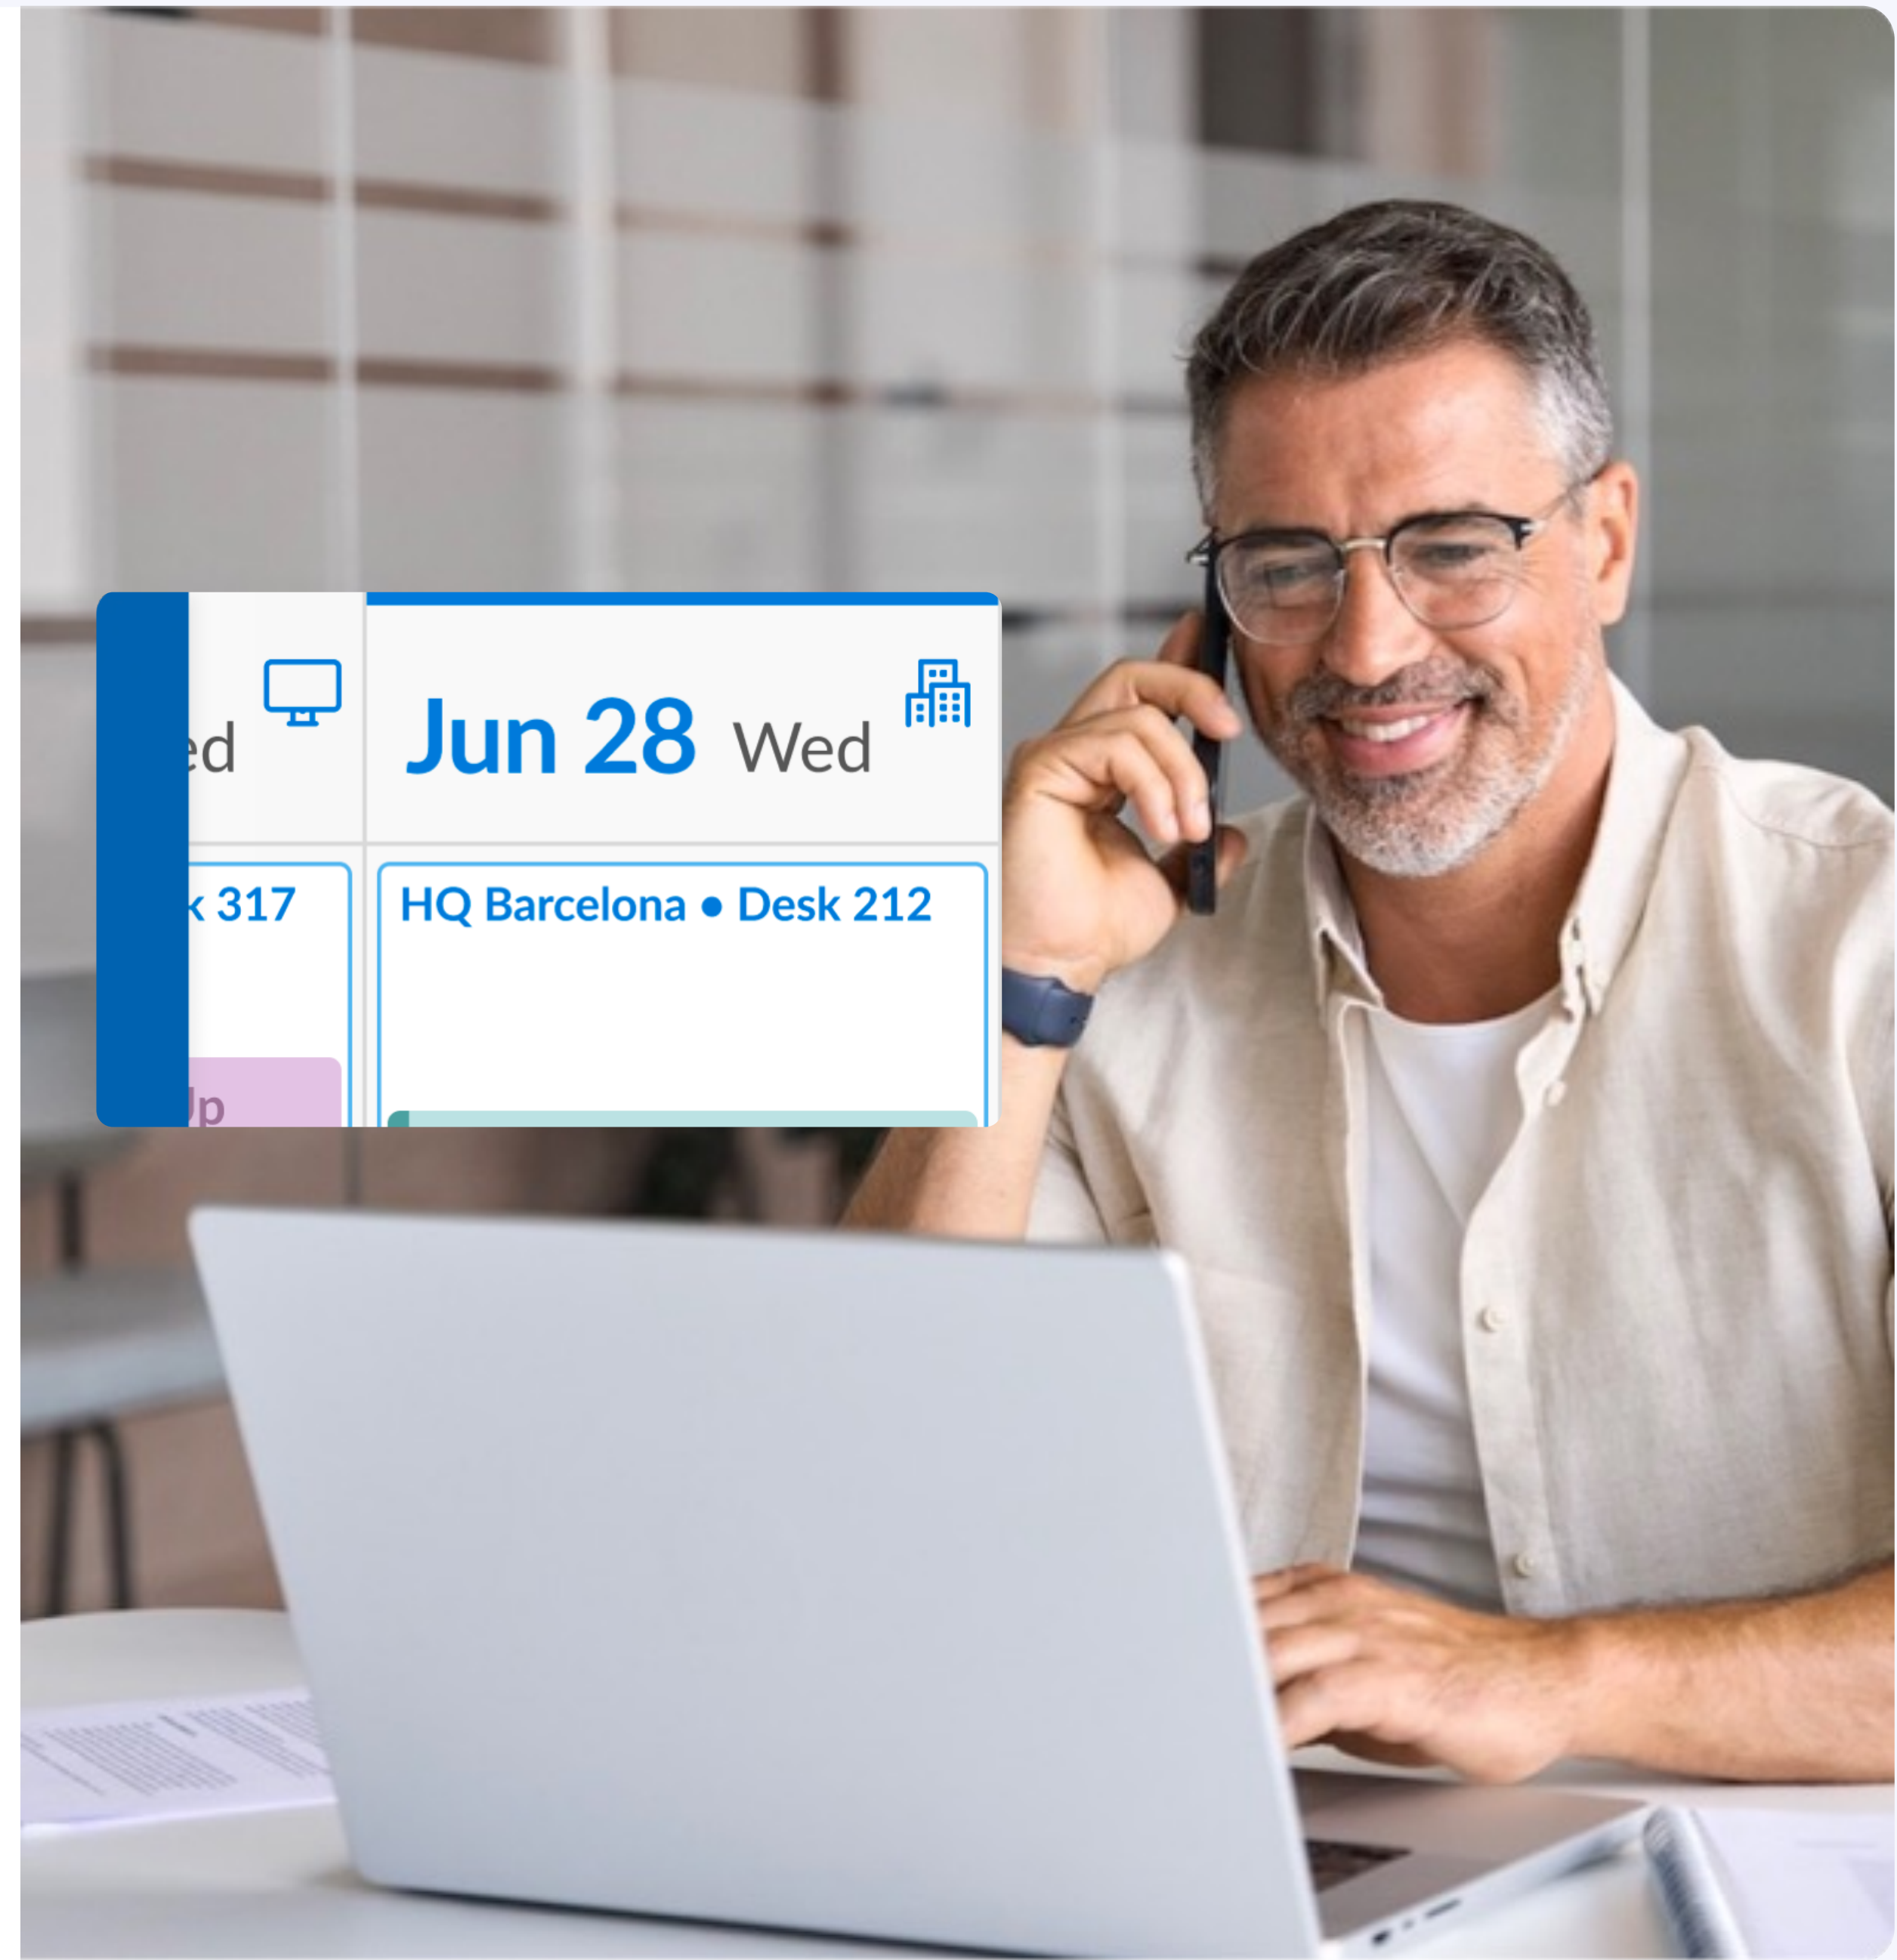

No one likes to enter the same information in two systems. This is why we integrate with your HRIS tool: approved absences in your HRIS will be automatically synchronized with deskbird.

Two-way sync with calendar systems

deskbird offers seamless integrations with O365 and Google, ensuring that both personal and resource calendars are fully synced - always. With deskbird, double room bookings and manual updates of calendars are a thing of the past.

Reviews

Loved by users and workplace managers

“The employees fell in love with the app. It is super easy to use and so much better than the solution that we have tried to build internally.”

Marvin Lange
Managing Director (CFO)
iu INTERNATIONALE
HOCHSCHULE

“deskbird lets us see exactly who is in the office at a glance. That not only helps us to avoid over-crowding, but also for employees to coordinate with colleagues.”

Michael Kahn
Director, Resources and
Development
R O S T R U M

“We have looked at around 20 providers and went for deskbird. Everything is so intuitive that we do not even need to train our users.”

Klaudyna Adler
Head of New Workplace
Strategy & Planning
SCHAEFFLER

“deskbird perfectly manages our daily office planning and desk booking. We referred it internally to become our global standard!”

Florian Weidinger
